# WHO'LL SIGN ROGER RABBIT?

s we write a formus hattle of bids is being waged over the computer rights to what promises to be one of the biggest box office smashes over Altasdy Who Framed Roger Rabbit' has grossed a whopping \$131 million in America since it opened last June, and it promises to perform similarly when it opens here on December 2nd Directed by Robert Zemsckis Stone" and starring the brilliant Bob Hosking plus a host of famous animated characters, "Who Framed Roger Rabbit' introduces us to Toontown, an extraordinary suburb of Hollywood inhabited by all the femous cartoon harone you've con Hoskins plays a down-et-luck human private investigator name Eddus Valient who is hired by Roger Rabbit, a moderately successful out why end by whom Roger's being framed for a Toontown who'll get Roger for the U.K? murder Durine his investigations Hoskins bumps into Bugs Sunny,

Bone'd Duck Retty Bono, Woody oodpacker and just about every er cartoon star you've ever he s of This mixture of real life and cartoon is made possible by some extraordinary new unimation So confident are licence holder

fait Disney of the desirability of "Roger" that they ve taken the inprecendented step of offening eparate licence desis for different tartlingly, at least on the \$4, the mpanies aren't bidding for onversion rights at all, but instafor an as-yet-unfinished game urrandy baing programmed by a may! Despite these very substantial limitations on env profitably, there is understood to be no shortage of compenies offering outadly enormous sums of meney or the rights Mediagenic/ Activision are already understood to have picked up the US rights. But

# LINEL'S CHAMP

hat with Mike Tyson pulling out of the longawaited thowdown on doctor's orders, poor of Frank Bruno must be feeling a bit peeved just now Never mind, Frenk, you'll soon be able to try your hand at The Chemp from Linel, a boxing game so realistic that it's been undersed by the World Baxing Council. Available in time for Christmas on the Amica, with a 64 version to follow in due course, The Champ follows the progress of a

young fighter from street brawls. through regorous training and sparring to world title fights. Well np. you won't stand to make millions of pounds out of this come even if you lose, Frank, But then again, it's unlikely to damage your delicate fautures

# THE **GHOSTS** RETURN

ust a mere three or so years since its muchlauded arcede debut, Ghosts 'n' Goblins is all set for a sepuel. Early 1989 will see Ghost 'n' Goblins Il's appearance in the arcades, and from early reports it's going to be a big much from the prining!, but the graphics are improved almost beyond recognition with the likes of baunted forests coumbling being beautifully represented Don't believe us? Well, just take a gender at this eaclusive preview screenshot. And, what's more, by virtue of Capcom's ongoing tie-up with US Gold. G&Gif should be appearing on the home market in all

its spooky splendour by next

# MIKE READ ON YOUR 64

ens of Cliff Richard lookelike Mike Read may ha interested to know that the Radio 1 DJ and TV pag show presenter will shortly be hosting his very own computer game. Elite have just signed up the licence to produce a game based on our Mike's popular TV show, 'Pop Quiz'. The resultant program is due out in November and will be called, with startling originality, Mike Read's Computer Pop Duiz.

# KATAKIS CANNED

action against US Gold to prevent publication of a gerne that they consider lefringes the copyright of their much-publicised forthcoming oversion of A-Type. The offending me is US Gold's Katakis, riewed in CU lest month. The rne was about two weeks from sase when Mediegenic lewyers Bowing this, according to a ediagenic seokesparson, US Gol that it was a fair cop". US Gold have now witndrawn Ketakes

Meanwhile, despite much sabre tling, it now seems certain that ediaganic will definitely not be king any lagal action egainst Telecomsoft in respect of Io. another game which seemed to some to be 'heavily influenced' by the hit frem coin-op. "After due examination", explained the spokesperson, "the similarities weren't quite as great as they had

# HOLY SOFTWARE!

ceen heve just announced their plans to release a istmas. They re-sig the licency to the caped crusader effer releasing games on the Speccy and Amstrad some two years ago. The pame is being written by Special FX though details

were scarce as we went to press. We're chuffed to say this gives us a chance to run a little composite giving away Frank Miller's definitive Knight' We've got six copies and all

ru nave to do to wie one is tall us net Bruce Wayne's butler is celled Answers on a pair of pixis boots to Batman Compo, Commodore User. 32 Ferringdon Lane, London

# REAPPEARANCE OF ROY

hase who mourned the disappearance earlier this year of Pirsoha Software. and thought that they'd pever see the star of Melchester Rovers in action on their tors need mourning longer. For Gremlin stepped in to pick up the famous comic footie star licence

when its original helders decided to opt out of the computer sames market, and their conversion of Roy Of The Rovers is due out next month. No news yet, however concerning Piranha's other two comic licences, Halo Jones and Judge Death, both of which are presumably still up for grebs

# F 16 READY FOR TAKE OFF

his month should sec the launth of Digital Integration's latest flight sim, F16 Combat Pilot. based on one of the most advanced multi-role fighters currently used by the USAF, Dogfighting, bettle support and

Intalligence gathering are emosq the different missions you'll be able to undertake in what Dig Int promise is an exceptionally accursts simulation of "the most chellanging and exciting aircraft to fly in the world" Well, any day new, you can meke ep your own minds.

# **MICROPROSE TO ENTER ARCADES**

to make a major assault on prove how seriously they the coin-op market, and to ive secured the services of form ari president Gene Lipkin to head the new division, known as

"We're developing our own rdware, out own software, we're neradon system," says UK bosa

According to Bell Microprose imes' products will be "simulator type" products but will also feature raphics and will be "of a quality ot seen in the arcades before"

The coin-op edustry is without a leader at the moment; we settend to take oper that position within a year," he added

# THE MUNSTERS AGAIN

brand new softco have menaged to secure the rights to that wondrously wacky 'n' camp '60s TV Show. The Munsters. &

elster company of budget mogula Alternative, the strengely named Again Again will be bringing out their debut geme for the Christmes merket. The TV Show concerns the averyday existence of a family of werewolves, vampires and

reconstructed corpses. Father Hermen is a Frenkenstein clone and mum Lilly is a vempirette, all of which has a disturbing effect on

their offspring. Written by the blokes who gave you Way Of The Tigar and Terramex, The Munsters is dua for a mid-November release on Amiga and 64. And the show's (ra)running on C4 now

# OCEAN UNTOUCHED

tioned in these owad pages that Ocean Softwere looked like they might shortly be shelling out for the eversion rights to the greavey wchables?Well, it took a bit

GAMES WORKSHOP SIGN ON

# ans of fantasy role playing games will be thrilled to foremost menufacturer of

hobby games, Games Workshop, under a three-year licensing deal. The first product of this skal will be a conversion of the Workshoo's most successful product to date. Was Hammer

We've managed to secure five complete sets of the Workshop's Fantasy Regiment miniatures, and to go with 'em, five copies of the book War Hemmer Fentasy Battle but we are now eventually able to confirm. In true you-read-it-herefirst-in-your-soarewey-CU style. that papers have been signed hands have been shaken and the Manchester movie-conversion eclalists have acquired the rights to the self-same files

And how do you get in sa these goodies? Just be one of the first five CU readers whose postcards come out of the CU to-comered hat. Entries, doubleplusquick, to War Hammer Compo, Commodore User. Priory Court, 30-32 Ferringdon Lane, London EC1R 3AU No questions to answer, so no brainache

Alterburner on the Mean Hacking

Sega's mould-breaking 3B highspeed aerial shoet 'era up first appeared in '87 to almost rapturous applause. Now, after much speculation and surmine, Activision's officially Roensed commision is about to int the streets.

> Based around two 16-bit proissors, a custom graphics chip; and a Z80 sound manager, the cade Afterburner seemds like a sugh act to follow. However, the miga version promises to be:

We spoke to Jez Sans, head of the Argeneut Software programming team, about the project.

The first thing to be tacklet was the horton, for which we worked on the aircraft sprite cetting it to bank and pitch correctly and coordinating this to be measured in the left is actually moother than in the ercate. In compilities we will be compilitied using 15 frames of second little during 15 frames of compilities using 15 frames of the second little of the second little of the property of the second second little of the second little during 15 frames of the second little of the second little of the second little of the second second little of the second little of the second second little of the second little of the second second little of second little of the second little of the second little of the second little of the second little of second second

To give the impression of forward movement, Afterburner uses four or five sprites of different sizes, with the inbetween frames generated from the bese sprite itself. This is most obvious when the sprites are over-

Obviously me can't as this using the Amigin's bentware, so was had to produce our own sprite englas, expalsed of encotating the englas, expalsed of encotating the Affectivence hardware. We are discovered to the englas, expalsed to the englassed to the englassed to the englassed to the size of the sprites second. Of course, this all despends so the size of the sprites second of course, this englassed and what they are obles, and the englassed englassed the englassed englassed the englassed englas

# **BOMBOOZAL**

We're not mer whether it's of the Glassest in the set at the meants, the three does seen to be much more at the meants, the three does seen to be much more at the meants, the three does seen to be much more and the seen to be seen to be seen to be seen to be seen that the seen the seen that the

landscape, which all uses up processor time. We average out at about 600 sprites per second, but if the sprites were static, we could print well over 1000 in that

Objects are shifted from background in fereground in berground in about 15 or se frames, again, depending upon the size of the sprite. After-borner nerve uson meet than 18 irames, since it moves so fast that any amouther changes would be virtually undefectable anyway.

iranis, since R meres so fast that ny smoother changes would be ristually undertectable anyway. We dis encenter some prolems in following the 3D measured of the rando machine theogh it desert use true 3D algorithms to plot fix always so or reflect the superior control of the angelorithms to plot fix always so or reflect the superior control that the superior control disease that the superior control

We currently hold about 1000 styries in memory, must at which were brand-drawn by a company called Focus, hired by Acthesian. Each spritts is only made as of hour colours, but we're constantly changing the colours scheme, and we can here more than 32 colours on-caree by use of 'coper lists' — those are instructions to a coperact seath of the colours on-caree making we in other the colour patiette on each becal line, in a similar way to ach becal line, in a similar way to

using rapter interrupts on a '64. 'Wa're confident that Afterburs year for the Amigs will be the most faithful conversion to date. The speed and gamephy are the same, the graphics are the seens,

ur memery restrictions will flow — and R's stereo!'
Amunos who saw Affactureser being demonstrated at the PC show may or may not agree. Everyone also can make up their own minds whan K's released in a couple of week's time. Managhilla Dublishing Assess

hieanwhile, Dalalisoft have been busy for the last five mooths, coding the 64 version. Again, you may have seen the demo runaing at the PC show, which was finished all but for the last few graphics, the soundtrach and some breaking.

Chicken in the basket

Foxx off.

64/128 **Image Works** Price: £9.99 cass £12.99 disk

OXX scar Wilds called fox hunting "the unapeakable in pursuit of the uneatable" and if, like me, you agree then Foxa Fights Back might gladden you a little. It's a name that should appeal FIGHTS BACK

warm the heart of a real hunt saboteur

just lacks that cartain something to

to all those people who would like to give clubs to seals and peopleskin costs to mink and lappards. It's also a lot of fun

In FFB we follow the routine life of Mr Foxx a member of the vuloine race who has to take all kinds of stick above ground from the local wildlife and below ground from his damanding voxstress. FFB gains full marks for animal rights cred but fails down a little on its saxism. No matter for Mr Foxx has had just about anough His four-legged spouse sends him out for some food and he's attacked by bomb throwing aguirrels, beagles on bikas (shouldn't they be smoking piparettes somewhere?) and rock throwing badgers (who should know better). So ignoring the firearms amnesty he turns the tables on the whole miserable lot by blowing away anything that hinders his foraging.

That I suppose boils it down to a pollectable shoot 'am up, but Mediaganic can relax because it looks nothing like R-Type. The screen scrolls left and right and Mr F can jump and run through its various stages looking for tasty bunnies below ground or chickens sitting weiting to be eaten in their coop. There are collectable demain the shape of apples, pies and sausages which you take back to the wife. Both kinda restore stamina to a flagging fox.

Weapons can be picked up in the shape of shotours and grenades to make fighting off the malicious wildlife a bit easier and an extra life can be obtained by finding a huntsmen's horn. Dying sends you back to the beginning of that particular section of what it a pretty large playing area.

FFB is fun to play and pretty good to look at too It's a Denton Designs game surposingly and although it doesn't have the kind of depth of many of their efforts, it's by no means a bimbo program. The graphics are colourful and cute whilst Mr Foxx leaps and bounds in smoothly executed animation Sound too is excellent with some good affects and some jolly classical All in all it's a polished page but it

# 64/128 Capcom/US Gold Price: £9,99/cass £14.99/disk

1 943, The Battle of Medway is Capcom's seguel to the succensful 1942 com-op. which also appeared on the 64 many moons ago. The bright idea behind the new version is to retain the familiar format but to make a few enhancements. In shart land why be charitable), they're squeezing more suce out of se old temon. Not that 1942 was a lamon, the analogy just seemed to fit.

The new version retains a great deal of the 1942 formula You get the same downward scrolling sesscape, with you in charge of the nowfemiliar twin-propolitored sea-glane it even performs the obligatory loopthe-loop ammediately after taking off from the erroraft carrier. Like the onginal, there's not much in the way of strategy. You simply try and blest everything that comes down the

But the similarities and there. The new version sets out to be more of a prolonged blast, in 1942 year could loss all three lives within minutes and get sent back to the very beginning - which is slightly more annoying than missing Brookside 1943 still gives you three lives but they don't seem to disappear as quickly. Each life is dependent on a

KI183538 P2:00008

go back to the beginning of that level - thankfully not to the beginning of the game. As you progress up the levels, there ere more enemy vessels to blast before your mission has succeeded Anyway, back to those POW

because you'll need the right kind of weaponry for different situations and for blasting different planes and vessels. Oh, and by the way, there's a welcome two-player option

thrown in as well 1943 is less of a manic blast than

idwa

damage mater at the bottom left of the screen. When enemy planes from ment for emost you gain gould even fire) the meter goes down a little. At rock bottom, you lose a life. Some planes, though, do fire and will lose you a life immediately. The damage meter can be made to go up again by collecting the occasional POW symbol that Floats down the

Changes have been made on each

level too. Now you have two phases per level to contend with. Firetly. you must destroy the attack waves of enemy planes before going on to the second phase which joyolves inflicting demage on enemy shipping as well as their protecting waves of planes.

If you don't manage to knock out all the gun turrets on the energy vessels, a "mission unsuccessful" messaga appears on-screen and you symbols. In 1942, you could zap. them by mistake. Not in this version POW symbols change into one of four other symbols when hit Collect one of these and you enhance your firepower in one of four different ways Shooting at the symbol changes into another one. So you can choose the weeponry you'll get

simply by fining until you get the

right symbol This is tactically important

an indirect route through various bunkers and landscapes, working your way around the impenetrable barriers which often protect each base. A map of the entire playing area, with walls and bases usefully highlighted, can be accessed by pressing RunStop.

By now it's clear that Fernandez borrows from just a bour every. Commande and Gauntifer variation there is, but so what? It's attraction lies in the shear skill with which it's been assambled, and an tike aftershow to detail that's been

lavished on the anterprise.

And I've left the best until last.
There's also a two-player mode,
where partners can cover each other
as they stride into action, and
onboard the jeep, one steers while
the other lets loose with the
machine gun
As unonginal as hell, Fernandez.

Must Din nevertheless shows us two programmers doing what they're best at, and doing it with style. After the delights of Zig Zig maybe Ratt in Bish are just marking timer, but I for one ain't complaining.

Bill Scalding

# FERNANDEZ must die!

# 64/128 Imageworks/Mirrorsoft

called Fernandez, dead or otherwise in fact it's the letest collaboration from the leten which gave us the ingestious and sedly uncertacted 2g. Zay last year, David Blakhop and the wayward Tony Crowther. It's a foray into the much-explored territory of the varicially-scrolling Commando-type shoot-out Your mission this time is — supposedly—to locate and destroy the soldy—to locate and destroy the soldy—to locate and destroy the soldy—

us is a strangely obscure title

for a game which doesn't actually feature anybody

territory of the vertically-accolling Commando-type shoot-out. Your mission this time is — supposedly to locate and destroy the eight military bases of a dictator. But, as as often the case with this kind of total annihation experience, you tend to lose sight of your objective in all the excitement.

We get a farmitier brid's eye view of the action, looking down on hordes of enterry helmets trundling back and forth across a landecape of roads and overs, buildings and burkers. Everything is depicted with learny and detail, even if the scale is sometimes bicarry, and the overall effect is a bit like a very busy model salikary layout.

And if your job to blow the wheel they to be a kneed with endless amono, 20 grenades and five Mexico and the medical amono, 20 grenades and five Mexico and the second and

All this havec will occur a few brownie points, but to start clocking up six digits or more you've got to do some exploring sideways. Closed doors to the left or right of the screen lead to enemy bunkers, end passing through these will take you into the neighbouring landscape—similar scanery, but a different colour.

Doors can be shattered by greateds, or armous-percong barooks shells from the jitap, and once intude I he benefit synd lifed yourself in a maze of sandbags, with bars of gold, amministion and prisoners-of-war scattered around the shop Remember Pandows's shot the Eagle's Mast, from says 1987?

This sovie counter starts blurning now, with 900 points for each now, with 900 points for each released POW, and hitting the Commodore key will call up an instant status screen which displays, the amount of gold collected, POWs released and briess destroyed Finding the bases is not so easy, and to made each requires threading

# 64/128 MicroProse Price: £14.95/cass £19.99/disk

nd Maier, the bloke who programmed Red Storm Rialog, is no strenger to the submersible world, he gave us Stlent Service a couple of years ago. His latest effort goes away from the World War II submarine tradition of "look through the periscope and let go both tubes" to the realm of nuclear subs, guided weapons and advanced sonar techniques. In fact, he's put us a few years into the future, into a world threatened by the outbreak of yet another World

As you've aiready guessed, this is one of those incredibly thorough and detailed MicroProse simulations that is up to the high standards set by classics like Project: Stealth Fighter and Gunship. As an extra attraction, they've linked it to Tom Clampy's bestselling novel of the same name, who gets to write the Preface "submanne warfara is ambush, followed by evasion, a game of life and death played in three dimensions of cold, well, unforgiving darkness" So that's how you write bestsellers.

Because of the novel you get what

Run situat run dees.

amounts to a came within 6 game Like other MicroPrese simulations Red Storm Rising gives you a range of battle acenamos to choose from and also a range of skill levels. But once you've got bored with these, you can play the extra and 'ultimate' Red Storm Rising scenario, a full blown war against (who else?) the section of the name, you proceed through a snness of High Command instructions and battles, provided you don't go down first - more about that later

Anyway, let's get straight down into those three dimensions of cold. wet, unforgiving darkness. The object of the game is protty straightforward As commander of one of five different submerines. you choose one of nine different battle scenes in which to show your

The battle scenes offer a range of situations that include both surface vessels and submannas The Duel: one-on-one scrap with a

The Cruise Missile Sub: some thing but this one might have a few 'quardian' subs hovering around. The Wolfpack fight a group of Russian subsiding wellpack tacties

The Boomer Bastion you must find and destroy a Russian ballistic sub A Strike Group: you've intercepted a task force of surface ahips. Now for

So bear that in mind.

taskforce. Get them before they get A Carmer Task Force the big one. your chance to sink a Ruskie aircraft

A Chance Engagement: one of the above atuations selected randomly so that you don't know what to

Whichever one of those battle

# Red Storm

scenes you decide to play, you choose the level of difficulty, from introductory, normal, serious or

I ske more other MacroProse suns. this one allows you to get straight into the action by embarking on a couple of training missions - one against a clapped-out Russian surface vessel, the other against an aqually clapped-out sub. To make things even easier, both are armed with blanks it's at this stage that you get to learn the controls which, admittedly, look very daunting at the beginning, as does the 100 page

You're provided with the usual kayboard overlay which is vital because nearly all the 64's are used for some purpose or other. Each key or function is very well explained in the manual and using this in ponunction with the Help button is a nice 'n' easy way of introducing yourself to the abundant controls and weaponry. Thats's a Pause button too, essential for flicking through the manual for that bit of info you knew you saw somewhere

The Help button, by the way, is described as a tactical computer which analyses the situation and then tells you what action to take. It's pretty good, too. The problem with submarine sims

is that, being underwater, there's really not much to see. So the programmers have added lots of optional acreans to the pomery Tactical Display you see for most of the time. You can zoom in and out on the man, zoom in to see weapons fired and waapons approaching, access a map overlay that shows water conditions like deep and shallow water and the ice conditions when under the Polar ice cap Added to that there's a whole set of screens concerned with identifying anemy vassels through their 'sonar signature' and having identified them, gaining information

capability. Go to the surface and you can look at tham through the periscops. But the major pert of the game is concerned with sonar and general sensing, since you can't actually see

on their sonar and weapons

# Screen Scene

anything. The whole object is to not let the enemy know you're there. For that purpose, your sub is fitted with active soner and raday, and a number of disvices, like the decay and noisemaker, to counter weapons that are targetted towards you Your computer tells you when an anemy vessel has been spotted and displays as much information as it can. As the vassel pets nearer or the soner gets better, the computer identifies the vessel, its bearing and the distance away

The booklet goes reto great detail about sonar, explaining how it works and how to use it in a variety of situations. Admittedly, this involves using your loaf but is assential il you're determined to dowall in the difficult levels of the

On the introductory level you can ank virtually anything with impunity, not bothering much with tactics. As you advance, the enemy becomes more cunning and will strike if you give yourself away by using active scear, running your engines too loud, exposing your

other things that should get you the

Firing and controlling weapons is an equally complex process and is, again, explained at length in the booklet. Some weepons, like the airborne Harpoon and Tomahawk missiles, cannot be controlled once fired. But you do have the action to control a torpedo through its trailing wire Airborne missiles also have a minimum range and a maximum

depth at which they can be fired. It's worth pointing out here that weapons do take a long time to reach their targets and may well have to circle a bit if the enemy takes evasionary action. So ddn't expect fast action blasting in this game

On more advanced missions you have to decide which weapons to carry to suit particular conditions. In one of the Red Storm Rising acenanos, you'll need to arm condition that factory Tomahawa missiles. To liven thence up. MicroProse have included animated scenes for weapons firing You can watch your sub launching a

weapon and watch it strike and hopefully sink the target - or watch a missile strike you.

Finally there's control of the vessel itself. You can increase or decrease speed, change dapth and set course either by antering a bearing or, in an emergency, actually take control of the rudder using the gursor keys.

A mission is completed either when your sub is knocked out, you knock out all the enemy vassels or they escape and there's no more for you to do. You're than owen a performance rating, a pat on the back if deserved and even a medal if you've done very well Now for the final Red Storm

Rising scenario. This involves a map of the North Atlantic and a storvime which, to my mind, is somewhat inappropriate given current East-West relations The drift of the story goes like this, islamo fundamentalists have knocked out Russia's oil wells in Siberia, feaving it senously short of energy supplies. In order to survive. Russia must capture the oil wells in the Gulf It realises that NATO forces would be too stroom so it sets on a

diversionary war in Europe to weaken NATO forces Before doing that it curningly sets up a smokescrean of disarmament to out NATO off the sount whilst indulging in massive rearmament at home. All this, by the way, is told in a clever mixture of text and animated graphics

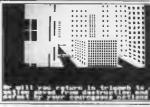

Your task is to carry out HO mission commands, sailing round

the North Atlantic to whatever apot on the map your instructions direct you. When you contact the enemy. you're back to the familiar Tactical Display and the battle commences. Only this time, you'll get another mission when this one finishes. Throughout all this, you get intermittent bulletins of what's happening in the war, and who's

withning at any one stage. It's not easy to get killed in the Rad Storm Rising scenario. Mysub was sunk after being hit by numerous torpedos. I'd really had my chips, I thought Funnily enough, I found myself recovering in hospital, issued with another mission and a bronze medal into the bargain Mind you. I had sunk a few ships bafore I went

Red Storm Rising is nothing less. than a brilliant game, it's obwously well researched, superbly programmed and it packs in loads of submarine warfare. Like most MicroProse games, it can be played at whatever level you like and is not really as daunting and complicated as you first think, although it does have depth if you're prepared to look for it. It also manages to make the most out of an unpromising scenario Let's face it. There's no speed and no fast shooting, you're just blimping around underwater But it's pretty gripping stuff all the Bohdan Buçişk

Victory might mean a ticker The Russians are coming tass welcome

# 64/128 US Gold Price: £7.99 cass £11.99 disk

must admit that when US Gold announced that they were going to team up with Pepsi Cole I wasn't overly thrilled, the reason being I didn't believe that going into pertnership with a company that makes fizzy drinks would result in a good gama. And I was night it

When I read the press release for the first game in the Peggi range. dubiously entitled Med Mix I expected great things from it, as it claimed to be addictive, colourful and 'the most original computer challenge of the Century' In fact it is

none of these things. It is Pacman The object of the game is to control a jovial vellow ball with a smiling face around a large scrolling maze littered with dots which have to be eaten by running over them. To hinder your progress, a matley bunch of coloured ghosts are released from a chember in the centre of the maze and begin to wender around the maze. Should you run into one of the ghosts, a life is lost.

In each corner of the mase is a power pill thingummy that enables you to duff over any chest it ancountars. The effect of these calls ere limited however. Also located at various spots around the maze are ugly faced icons that turn your ball into a mean and moody pink/brown grizzly bear that also has the power to show abosts where to get off. The problem with being a beer is that you can't collect dots so you have to wait for the bear effect to weer off

before you can get back to the job in

At the bottom of the maze, next to the about chember is a short runway tixat has the odd affect of transforming your ball into a laser cannon when it passes over it. With a stab of the fire button you can now loose off a bolt of laser fire to kill any ghosts directly shead of you. As soon as you leave the runway, you are turned back into a weedy little ball. Later levels see the arrival of extra features such as one-way doors and .. er . well, that's about it really. Collecting all the dots on the screen will allow you access to the next level. Clear all 15 and . you probably get sent back to the

Mad Mix is pretty weak stuff. All US Gold have done so to take an non-old games concept. tart it up with a few extre features like a scrolling maze and plaster the word PEPSI all over it to make it look all hip and trendy. I wouldn't mind if the game had been any good but it isn't Cosmetically it's very poor

indeed. Minute apritee and second rate bas-relief beckdrops don't impress me et all, and nor to pathetic weedy sound effects that sound like a muffled doorbeil and lame title screen music Worst of all is the completely outdated gamepley I took the People Challenge and dacided I preferred the other one

Hetio ahrimp.

When in trouble consult the map

The temples offer healing, and the various shops and taverns can provide a wealth of information as well as just the usual wares.

Once inside a city the view changes from a 30 view to an ovarhead Questron-type landscape pockmarked with mountains and various remote places of interest. The other view is the map view. which can be called up from the meny bar at the bottom of the screan, it's from this bar that you do all your stuff, including things like manipulation of items, spell casting and memorisation, setting up of camp, viewing of characters as well as all the combat commands Combat consists of a large overhead view of the room you are currently

in, with pictures of your party and

the enemy in their relative positions

As you choose an action from the manu, you see a small animated sequence showing you what you've done For example, choose to hack at a Kobold with your sword, and you'll see the little loop swing with all its might Choose to fire an arrow. and you see the arrow fly at the enemy, accompanied by a twanging

sound affect. Pools of Radiance is everything an RPG-er could wish for, and can see it appealing to persons not of a

pixie-bashing nature too. Unfortunately the disk access is a ittle slower than it could have been. but any game that has me playing for nine hours into the wee hours of the morning has to have something

Tony Dillor

going for it.

Keep walking in the right direction

and you'll come to the Moonsea,

and offers work to any passing mercenenes/adventurers The advancement, provided you have the experience points and the cash

CPPROCES, A LOUD

HOMESOFT (UK) P.O. BOX 49, LEYLAND, PRESTON LANCES. PRS 1DG, 0772 452414 4 x 4 is really a pretty ordinary ricing game with a lew extra bits botted on to spice things up. The extra bits amount to a choice of four terrains and four vehicles, with the ability to customas your vehicles to sout the

customas your vehicle to auit the conditions.
The terrains look pratty much the

same. The sand in the Baja desert is cunningly disguised as show in Michigan, whilst the desert each do agood job of looking like fir trees. Like the scenery there is a choice of four trucks, two American, one

Japaness and one British model. A list of specifications is given for each truck to help you choose one that's best for a particular terrain From there, you mosely down to the Custom shop and the Automat.

From there, you mosely down to the Custom shop and the Automart to do the necessary customering. This is where you buy spare tyres, a when, extra petrol and a canepy. The Automart supplies more besue stuff like oil, water a too list and even a mechanic.

Why a mechanic? Because when you need to do repairs, this bloke will get you going quickly. But you pay the price of going more slowly due to the extra passenger.

You start as the last man in a 17 man rece. You see the standard view of the back of the muck with the road ecrolling (cwards you, Joystick control in very basic, amply press the theoutton to accelerate, push back to slow down and forward to briste muck!).

Catching a rock or trea trunk with just two wheels results in a wheels for a law year's Smazking into obstacles headlong makes the truck take off Buggy Boy style, do a lew acrees saults and land again with apparently no barm don.

The only really worthwhile resure on the road is the Doombuggy, which sounds its horn styou from behind and trees to push you off the road At the bottom of the screen you

find spaedo, revicounter and a load of warning lights for various bits of their. The lights turn blue for medium damage and yellow when things are looking senious.

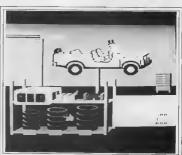

Each roce starts at 8am with chickpoints every two end half hours. A checkpoint is a compulsory stop at which you can do repairs if you wont. A damage screen is displayed showing just what needs floring, and will appear at any point in this game at which sustained damage is too great to carry on

Here, you must do repairs before carrying on — providing you're carrying the necessary spanes.

So you rise on into the Michigani Death Volley/Georgie surest until you either win or finish amongst the runners, in which case you'll see a soore screen showing your placement and race timing. Winning all four terrains gats you King of the Road status.

### 64/128 Epyx Price: £9.99 cass £11.99 disk

4 x 4 is a competent game with inverage graphics and a reasonably good racing section. But it's simply not vising enough and its gives me the annoying impression that they couldn't be bothered to make it into something special.

### 64/128 Elite Price: £9.99 cass

n 2025 the destruction of the ozone layer has finally come about, providing some mea chunky post hologoust plots for a computer game. The only means of transport between cities is via the old freeways, now controlled by roving gangs of anarchic rebels. The only people foolhardy enough to

attemnt to traverse the roadways are the overlanders - providing the price is right.

At the start of the game you are given two missions to choose from. one paying more than the other because of its greater difficulty. Half the mission pay is handed over to you before you set out in order to buy those little extras that make a journey safer Fuel, of course, tops the shopping list and eats the largest nortion of your cash. Money can now be scent turning your already hot car into something that makes Knight Rider look like a dinky toy Turbo units, battering rams, wheel

blades, rockets and flamethrowers are but a few of the large emount of rtems available

Each of the unsavoury gangs who haunt the road have their very own ways of dealing with unwanted visitors, the Kilmrkizees (ugh) think it most honourable to commit hari kin with your bonnet. The Road Hogs do their damadest to force you off the road and Crawlers litter the rout with lences and cars while taking pot shots at your vehicle from the sides of the road. At the end of every road the Officeadire west in their heavily armed vehicle. You have to wipe them out to complete

As driving games go this is not very good. The road seems to fall short of the horizon by a good distance and the hills update very ierkily. The car steers well in

companson to Road Blasters but still sides around a bit too much to be realistic. Gun turrets pose the only

real threat but it's severe enough to strip you of your remaining lives. Overlander is the best of the drive a-long shoot 'em ups but still faile tomake the major league. A few graphical enhancements in the road layout and cars would have made this far superior to what it is now

### 64/128 Psygnosis/ Melbourne House/ Mastertronic Price: £9.99 cass

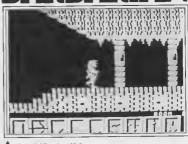

ven when Barbarran first appeared it was difficult to see why anyone would willingly buy a run-of-the-mill arcada quest, even for the than software-sterved Amiga.

A year later, and shorn of the detailed graphics which were its mein attraction, Barbanan on the 64 now looks so totally mediocre it's surprising that Mastertronic haven't released it as part of their budget

rance Armed with eolossal bicens. sword and long bow. Hegor descends into the bawels of the earth and the depths of cliché on a quest to destray the evil Necron. For only then will the land be free of the fear and terror that has claqued its villages, ravaged its crops etc. etc.

This rubbish might round original to novice Amiga owners, but us loyal 64 users have had it up to here with moronic axe wielding psychopaths. The only way this kind of stuff gets tolerated is if there's some sufficiently novel twist which makes gameplay a new experience But the only unusual feature in Barbanan is an unnecessary and

# BARBARIAN

### Watch out for latting rocks musclebrate

clumey icon-control system. Displayed beneath the screen, and sed by a lovatick or keyboardcontrolled cursor, it gives options for running, walking, jumping, somersaulting, fighting, phanoing direction, picking up objects. climbing and selecting weaponry As nearly all of these actions could

be directly controlled by the joystick - as they are in almost all other games of this ilk-then Psygnosis must have only one reason for choosing this pervarse control method without it the same would be too goddam easy.

Gemaniay book down to embling along corridors and climbing up and

down ladders, collecting weaponry and killing the one-legged gremlins, ogres and moneters before they kill you And all the most infunating characteristics of the genre have been included: dead monsters which are resurrected as soon as you re-enter a room, booby-traps which can't be foreseen or evoided.

### ELIOG 64/128 CRL

Price: £9.95 cass £14.95 disk

volung is a sport with a very high SB - or Sore Bot rating, although not quite as high as bronko busting or tobogganing in your boxer shorts. The Kellogg's Tour of Britain cycle race has less SB than the Tour de France because it's only about half the distance. It also has much less. charisma since not many procyclists actually dream of ever

Anyway, CRL's version of the Kellogg's Tour has a high SW - or Sore Wrist -- rating, owing to the fact that it's one of those joystick

would never reappear.

The game, described as 'official' in a faithful rendering of the race which as we all know, finished several weeks ago and nobody remembers the winner. It has acc stages beginning in Newcastle, pessing through York, Manchester Liverpool, Stoke, Birmingham and Bristol, and finishing on London's Westminster Bridge Throughout the stages them are various sprint sections on which you can win time points which are automatically

deducted from your final time

You start the race in 67th position, the plact being to work your way up through the 'peloton' as you progress through the six stages Just like the real thing various vests are up for quabs. Reach the top of a climb first and you're awarded the King of the Mountains jersey. Winning a TV sprint gets you the white one. Win a stage and you get

Now for the cycling bit. As you've already grasped, waggling the lovelick from side to side makes you go quicker. You also have a choice of two lonly two) pears, high pear for the slopes and low for the straights - not too taxing for the brain, that Apart from that, you must take food at regular intervals to retain your steming.

All that lot is cleverly displayed as a mw of score at the bottom of the screen Food is depicted as a bottle which gradually empties, whilst the slopes are upward or downward gradients. It's a good idea to keep an eye on this so that you can change to the appropriate gear in good time The only other hazards are the other cyclets who lose you speed if they bump into you or you into them.

Graphically the scenery is rather impovenshed and repeats itself for each of the stages. You start on a street scene, move out into open

country, and then finish the stage on vet another street scene. You don't even get an idea of uphill or

downhill sections - rt all looks perfectly flat Fortunately, the cyclists are better defined. They're large and their legs pedal realistically, quickly in high pear and less quick in low. They've all got that nice crouching action

A nice touch is that you get a map of Britain at the end of each stage showing the course completed as a solid line and the next section as a

Reshing line Another aics touch is the 'gostion in race' indicator at the left of the

screen. You can actually watch it oc down as you overtake a cyclist Kelloop's Tour is a generally wall designed and well presented game but it loses out drastically on gemeplay. It's all too simple and there's nothing really to do except waggle away at the joystick But that sums up cycling. It's not much fun unless you're actually doing it Over to you Pedro

Robdan Buciek

and, of course, the conspressions absence of a Save-Gama option.

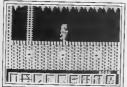

The graphics are nothing to write home about, and the animation is restricted (especially that of the Vanous nastical, And somewhat curprisingly, considering this is 1988 and not the middle ages, there's no honzontal scrolling. I'd forgotten just how irritating Rep-screen games

Worst of all are the sound effects - or rather the almost total lack of them. Except for the odd unsuitable. whoosh when Hegor rubs out an

enemy, and the occasional rumbing noise - either a distant dragon or eisn the plot creaking — there's no sound at all. Even massive rocks come creshing to the floor in complate silence

Still, there is one good thing about Barbarian - and that's the netty lettle fooding game by Aplin and Hubbard This is pure Space Invaders accompanied by some frenzied music, and takes you back

to those days when playing computer games was hin. Bill Scolding

Addictive Price: £2.99 cass

his game has got great instructions. How many times have you studied that time silver of paper under the magnifying glass for a good half-hour only to discover that it seems to describe a game altogether different from the one you have just booted up?

None of that with Metaplex A demo goes through the game telling you what you have to do, showing what a teleporter, spare vehicle, and tank and so on look like so there's little chance of the kind of infunating cook up that's likely to end up with the joystick stuck to the forehead of the nearest passer-by

Metaplex is a metal labyrinth. home of the horrible Garth Garth is twice as ugly as he might be on account of howing two heads. The general consensus is that life would be a whole lot better without Garth pround and guess who gets the short atraw

Destroying Garth, as you would imagine, is not simply a question of finding him and hitting him on the head with a blunt instrument Garth's power comes from four power points located in very difficult to get to places around the maze. To weaken Garth before finishing him off, you must first locate the power points and destroy them - pulling

out she plug simply isn't good

These power points, being of a particularly sophisticated high-tech design, can only be destroyed by a liberal dousing with soid, and the acid can only be obtained from particularly difficult to reach soots within the labyrinth.

The task then, in short, is to find a flask, fell it with acid, poor it on the power point, do the same four times, go gat Garth, then get put. You have limited time to achieve all this

You scoot about in this thing that looks like a cross between a pram and Sentlair C5 and frequently find your path blocked by number coded doors, wind tunnels and other obstacles These can be overcome by using these switcheroo thingree which you can find, surprisingly enough, quite easily By sitting on goodies on the control panel. This offers you super shields, super lasers, unlock doors, neutralizes wand (pardon me) and all sort of

other helpful things I dunno whether it's addictive, it kept my attention for a couple of hours, but I wasn't overcome by compulsion to go on all night Metaplex is cortainly cloverly thought out and interesting, but it's let down a bit by the crude graphics. Garth himself is particularly on the leggo-like side and the scoot about vehicles, though they scroll well. don't have any of the realism of

Star Goose --- semething of a funkey after Star flav

The goose that tayed the appare one

# Stargoose

he authors of Firebrid's Rtack Lamp, Steve Cain and GP 'Kenny' Everatt, have put their heads together again to produce unusually titled Star Goose The Star Goose of the title refers

to the oddly shaped craft which the hera of the piece, one Mr Sequeer-Gitt, has to priot over the geodesic landscape of Norm in his search for the Normans' jewels

After being dropped from a Geess begins the negotiation of the vertically scrolling Nommian landscape Made up of angular sloging hills and valleys, the Star Goose hugs the contours of the its crientation as it does so

The Nommian defences are made. up of gun emplacements, atebo mines and small highter craft which whizz around the landscape. The surface of Nom is also littered with hazardous liquid-folied pools into which the Geese can fall and are

The current Ster Goose has shield.

fuel, emmo and massle supplies which are constantly dreined during play Shields, fuel and ammo can be replanished by flying into the corresponding entrances which are querified by a hine metal face whose mouth opens to allow the Goose #Ccess

A tunnel is then entered which has a senes of large eyes dotted allong its inner walls. The Star Goose can be manoeuvred around the tunnel interior and collecting the eyes

TOUGNNESS

progressively restocks the supply in question. Missiles are simply collected by flying through gateways along the route

At first aight, Star Goose looks quite interesting, and the way in which the craft follows the contour of the ground is really captivating Unfortunately, the gameplay fails to

or two annoying design faults. The aim of each level is to collect six differently coloured jewels, and then re-enter the portal from which the Star Goose appeared. A similar but more fiercely defended fundscape is then entered, and the

process repealed. Destroying many of the obstacles and emplacements is made difficult by dint of the fact that the Goose can only shoot objects on the same level as itself. Your builets fly uselessly into the air or simply hit the ground when moving up and down alopes. respectively. So gun emplacements sitting on top of small hills are almost impossible to shoot — you Amega?) and you're left with a shoot usually and up remming at and em up of very little variety, and one wasting your shields. One could then argue that this is a job for the

missiles - but guess where the missile fire buttons are? Yes! On the keyboard- end it's not even one key - you have to prime and fire the twin massles individually using the 'A' or 'Alt' keys A minor outbble, but one which I found really annoying, considering the precision needed to guide the Goose in the first place As the hero says in the introthey're so boring if you've scrolled over one planet blasting away at Gad-knows-who, you've scrolled 'em all', l'couldn't agree more, you Scouser-Gitt

out when I was beginning to leed that the folf-to-right acrolling. #Type game format had been done to death. Zyraps comes along and protes me completely and utterly wrong by people the property of the most colourful and certainly one of the most colourful and certainly one of the most enjoyable certainly one of the most enjoyable certainly one of the most enjoyable.

shoot 'em ups yet to appear
If you can cast your mind back
about nine months or so, you'll
remember that Zynaps,

programmed by Graftgold boys Dominic Robinson and John Cumming caused guite a stir on the 64 when it was first released, and scooped a number of accolades, a CU Screen Star (most importantly). Zynaps is yery much in the same record as games such as IO and Nemesis. The basic idea is to fly a spaceship through a series of linft-tonont scrolling levels, shooting aliens and accumulating extra weapons as you go. The scrolling is set at a fixed rate, so you can't bottle out and head back helf way through if the going gets too heavy (which it invariably does).

The aliens that ettack don't just foat around the screen any old how Each wave has it's own appoint attack pattern, the most common being a bounging cateroillar-type string of nastins. Unlike R-Type or Nemes's however, the order of the attack waves ran't preset and so there's no way of telling what kind of altens will be the next to errive on acreen. As usual, disposing of them is just a matter of shooting them. he trouble is, the laser you're given of the start is a calber proful little weapon, and there's no way you could possibly get through the entire game without trading it in for something a bit deadlier. This is dans by shooting a wave of marauding aliens, which leaves behind a glowing power-pod. Collecting this with the fire button held down will activate the weapon currently decacted in the status display If you want to advance to higher levels of weapon, however, the way to go about it is to collect a few pods without the fire button held down. Ench time you do this. the 'carrent weapon' icon will edvance to the next in line. When the one you want appears, just make sure the fire button is down when you collect the next capsule

There are about five power-ups available, molading the obligatory speedup and bomb, and my personal fave, the super homing mastle which appears at the end of the weapons list. Collect a couple of these, and you've got unusually nothing to worry about. "By "eck,

# Rocket Ranger

sk enyone to name something that the 1940s are best remembered for, spart from the Second World Wer and the chances are the reply you'll get will be the old Republic Cinema enals which captivated Saturday Morning audiences both young and old and on both sides of the Atlantic for many a year, and still have a cult following today. One of the most popular of these was King Of The Rocket Men, which followed the hero. Commando Cody as ha istpacked around the world. thwarting evil criminals and duffing up Nazis. Rocket Ranger is an attempt by Cinemaware to capture the old magic of these seriels, and the end result is botter than arryone

could have hoped for.
The storyline of Rocket Ranger is suitably comy and presented in the form of a wonderful graphic operang sequence at the start of the game. The year is 1940 and Cody, a US Engineer setving at Fort Dix is working late one might when, after a working late one might when, after a

mysterious binding flash, he finds an assortivent of wonderous rockst augument on his desk. The accompanying booklet fells is terrifying story of a world 100 years distant, in which the Nazis have won the war, conquerad the entire planet and now rule over it with their own barbane form of 'government' in an attempt to store this

in an attempt to stop this horrifying eventuality, agents from the future have sent the equipment back through time in the hope that some brave soul will take on the role of Rocks Renger, and snight handedly thwart the Nazi's plans.

After the opening sequence, the game proper begins at Fort Dix, where Cody plans out his mission report to the War Room, where five top secret agents are sent around the world, gethering intelligence on the Nazis plane. The first piece of information you'll get is from your agent in Germany, who informs you what the Fascists are up to. Their plan, dayised by the evil Colonel Leermeister, is to crush the allied forces using a new form of bomb powered by Lunarium, a rare mineral found only on the Moon. To get the Lungnum from mines on the moon, the Nazis are brainwashing women, turning them into zombie like slaves, and sending them to the moon to mine the Lunarium. To stop the Nezis before they can realise their diabolical plan, Cody must callect five individual sections of space rocket, each held at a secret Nazi base Once he has all five, he can piece them together and fly to the Moon, where he can attampt to destroy the Lunarium mine. To find the racket besee, Cody must position his agents around the world via a map screen which uses icons to show where each agent is To look for a moket have nosition an agent in a country and wart for him to report back with his findings. Sometimes the country will be clean while enother time it may hold a rocket base, a secret Nazi Lunanum plant, or a number of assorted Nazi hidenuts, such as the brainwashing complexes or munitions dumps. Once an agent has found a base, he can be transferred to another country and another mission (providing Lawreng estar hasn't found him and had him shot that is 1. As soon as Cody has some useful information, he had better act on it and fast, as

the Zeppelin bombing fleet gets

Sefore he can go anywhere, he must

Mirrorsoft/Cinemaware

nearer every day. Should Cody stay at Fort Dix for more than a year, he's Count Martialled for cowerdice, and

raphtly so, Using a code wheel supplied with the game, the nocket pock can be loaded with the right amount of Lunkrain to travel to the destination country. Taking off from Fort Dox us in tricky procedure that takes time to master Cody runs from left to right across the parade grounds, and the logistic busines must be pressed Cody timbers up for takeoft . .

each time his feet hit the ground to build up speed. When he is running fast enough, his rocket pack biteps and pushing up on the stack will propel him skywards. Should the button prisses be out of synch with Cody's floatings, the rockell pack oughs and wheeves and Cody falls flat on his face. If this hisppers three times, Cody takes off sutomatically,

The Prat and his daughter are saved from the civiches of the avil Wazis.

Electricity, Energy for death.

ec

but at the expense of two months' training time

After takeoff there's a short graphic sequenca that shows Cody's flight over a world map before he reaches his destination. When he finally gets there, there'll be any one of four different lands of battle awaibing him. For example, if Cody arrives at a country occupied by a Nazi complex such as a bomb factory or brainwashing plant, a Space Harrier type game has to be played. A rear view of Cody is given as he flies high above the clouds and is assaulted by a crack squadron of Nazi planes. The plenes atteck in wayes, and in many different kinds of formation, firing at you as they

Find this one in the pame if you see.

causa his rocket pack to cut out, and he'll be forced to perachute to a nearby country. Fortunstaly he's carrying protection in the form of a deadly rapid fire redium pistol that kills 100% of all known fascusts dead with just a single shot. If Cody manages to knock out the entire squadron, he automatically completes the mission in hand, and the result is displayed as a text screen, detailing exactly what Cody has achieved and how much Nazi afficiency has suffered. Slowing down the Nazi war mechina is the key to winning the game, as should they attain 100% efficiency thay win

the war outsight. Flying to a country that houses a rocket base sees Cody angage in hand-to-hand combat with a German quard as he hetiles to steal a piece of rocket. To defeat the guard, Cody must reduce the guard's energy lavel to zero by continually punching him. Tha quard is normally delensive and rust concentrates on blocking Cody's punches, so Cody must be alert. punching the award in the head when he blocks his body and wen versa. The quard will from time to time have a jab back at Cody, so he has to be ready to block as well, or he'll get duffed over by the guard

and be captured. When the quard's enterpy reaches are to the falls back against the well, billing his head on a control panel, billing his head on a control panel, and opening a steel door that sides back to reveal on an of the allusiva rocket parts without is then amungable back to Ford Dan by your frands in the local resistance. The first part is a wellknown to win, but the rest is not on easy, at the solders who guerd.

Rocket Ranger is a BIG game. So bug in last that, the previous Chemoware gamen a Tillay up the ordist. Furthership have a CU wa've get an externed deals, driving a company of the company of the distance and a distance principle was selevated and distance principle was selevated and the company in the comp

tham get progressivaly tougher. As you fly about the world gatharing rocket parts, Cody's Lunarium supply begins to get low, so it must be replenished by raiding the Nazi Lunarium plant With any luck Cody's secret agents find it guite early on in the pame is's normally found somewhere in Africa) and he can then raid Lunarium from it himself or receive it in small amounts as it's stolen by partisans The Lunarium base is heavily quarded by Anti-aircraft guina, so a night attack is necessary. Zooming over the base in the same Space Harrier fashion as described earliar, Cody must knock out all the ack-ack owns with his radium pistol while avoiding the flat they throw at

nam.

Andle from the main mission of acquiring rocket perts and stealing culturarium, there are a couple of aub missions that must be understein if the hairs are to be stopped, the first the hairs are to be stopped, the first the hairs are to be stopped, the first the property of the stopped and the voluptuous or product and the voluptuous or product of the moon, where the Prof would be forced to use his scientific, knowledge to speed up Lurarium production. To stop them reaching a

# Rocket Kanger

neants seem the world.

you of that. Sound a of a similarly high quality with plenty of lunes and exqueste sampled effects. Just listen to the fist fight for some real banearunching purish sounds! What little speech there is is well executed - far better than the crackly samples heard in The Three

What makes Rocket Ranger such a great game is the way all the different ideas hand together making on overell product that is by far the most fun I've had with my Amiga all year.

Gery Whitta

the moon. Cody has to fly to the Atlantic, where a zeppelin is taking them to the Fatherland. Yet more Space Herrier ficlics here as Cody chases the zeopelin, avoiding the air to air missiles and trying to shoot the gandala section at the base of the airship Missing the gondola and to blow up and the mission will have failed. Successfully hitting the gondala will see off the Nazi gunners, allowing Cody to board However, the mission isn completed yet, as the Prof and Jane have no idea who Cody is and won't allow him to get at the airship's controls unless he can conv them by choosing the right things to say to them for a selection of set

phrasas. If Cody can stop the Naza from getting the Prof Lothe moon, he can buy arrough time to get the rocket parts assembled so he can fly to the moon where the final battle takes place With Radium pistol in hand, Cody faces the female lunar zombrus scantily clad in leather hip-boots who drop down from ropes and strafe him with laser fire. Cody has a lumited time to destroy all the female zombies by blasting them with his

gun before the exposure to the Lunanum causes hem to black out Lunanum affects men but not women, which is why the Nazis are using them as slaves). Shooting them all before time runs out brings unanum production to a halt. thwarting Learmeister's plans and saving the free world as we know it. Rocket Renover is quite simply a brilliant game Onemaware, ofter much experimentation have at last produced a game that truly combines state of the art aesthetics. with cameplay to match. The strategic side of the game such as positioning your agents and gathering intelligence is absorbing and all the arcade sequences. particularly the fight with the guard and the shoot-out on the moon are so good they'd make commercial quality games on their gwn1 As usual presentation is exemplary. The film-style opening sequence is atmospheric and there are some excellent set-pieces such as the takeoff sequence and the secret Nazi trenamissions picked up on Cody's wrist monitor. The graphics are far

better than anything Cinemaware

screenshats here should convince

have produced before, and the

Cody contemplates life, the Universe and racket packs.

See what you can so with a squaszy bottle and a folial rall tube II you put your mind to II?

econd release after Stay Ray bears a slight similarity to other games in the ageing Geuntlet genre, insofar as it's a multi directional scrolling affair viswed from above, in true corny plot fashion, Quadrakun is set in the distant future and takes place on a hugs computer controlled energy base in deep space by the name of Astra. For some unknown reason, have shut down and subsequently the base is dangaroualy closa to meltdown Your mission is to stop the reactor from melting down and dastroy the mother alien in the

Fortunately, you don't have to travel to the base yourself instead you're given two droids (from a possible choics of six) to do your bidding by remote control. Each

# QUADRALIAN

drold has its own specific atreneths and weeknesses, and learning exactly what they are is part of the key to success

As part of the computer maifunction, all the levels of Astra apart from level one have been sealed, and progression to the higher levals is schieved by reaching a certain score, whereupon you are allowed access to the next one. If you can't be bothered to go about solving the puzzles in the game, you can simply blast

everything you see with your lasers until the target score is reached. This a case of methodically dropping

however is a time and energy consuming process, so the best way to actually complete the game is to aet about actually sorting out the problams on each level in turn. The puzzles are of a fairly simple nature and require more dexteriby than at stegic (hought, due to the name's arcade overtones. For example temporantly slowing down the bases rapidly rising temparature is done simply by rodging up against a barrerl of cooling flood and pushing it down a chote

Completing the mission is not just

rechargeyour batteries, class any redioactivity from you and gain information on the current level's Clustershipm is a bit of a letdown after such an impressive debut release. It saems to me that the

## **TANG** Microdeal Price: 24.95

fter wading through the small booklet that forms the ratructions for Tanglewood, I finally managed to come up with a short version of a long-winded plot. Your uncle who claims to have the sole mining writes to the planet T'ngly-y-wd is being muscled in on by some big. man who know about the valuable ems scattered about the planet. These nasty men have also stolan the documents that prove that your uncle has sols ownership. What you have to do is to find the documents and hand them back to their nightful

it all sounds pretty easy, if it weren't for the fact that you can't actually go down to the planet. Something about the temperature or some such motterings. So what you have are five different types of mining robots, called Mobiles through to 6, and it's with those that you have to carry out your duty

through a cockpit/control panel and a large window on the world. Viewed from above, it's at this point you notice how crude, almost childish, all the ortphics are. Though it looks like a "true overhand view, a quick examination

show it to be nothing more than a series of icons laid next to one another. In fact, large though it is, the landscape is very bland, with just a dozen score being repeated over and over again, to represent bushes, wasteburs, buildings and paths. This would have just been acceptable on the 64, maybe, but on the Amiga?

The five mobiles are controlled by moving a gointer into the map area (if using a joystick) and clicking. Movement with the joyatick is ralatively easy. Just push the joystick in the required direction. Mouse control, however, in meredially tetchy. When you click you have to imagina that the pointer is in the centre of a four pointed star and move the mouse along the arms of it to move the mobile

Unfortunately, the greatest distance from the centre has provity, which means that, if you move the pointer up the screan 100 pixels, and you then want to go right, you have to move the pointer more than 100 pore is to the ooht, which means that distances get greater and greater. making the game more than slightly

unplayable Around the edges of the map are switches and divis. Those show you the outside temperature (a waste of time. I thought, as it doesn't seem to affect you at all) and the amount of energy your mobile has. The switches are there to perform mundana functions like quit game, save game, sound off and the like.

Vicco

Acron

Vest

Точаннени

Also there's an interesting switch that tells you where you are. The funny thing is that, no matter where I was, it always said 'On a noth'

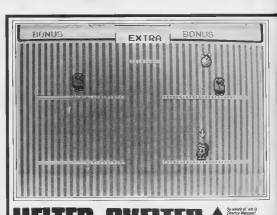

After playing Tanglewood for a while, I began to feel that I was going round and round in circles. After playing a bit longar, I still found I was gatting nowhere Tanglewood is just another one of those games that can claim to have billions of different acreens, but makes no glaim that there's anything in any of them. If you want a game that in any way show you a little of what your Amon is really

capable of, then look elsewhere Tony Dillon

# HELIEK SKELIER

ASL Amiga Price: £14,95 disk

The title of ASL's latest Amiga release is somewhat make ading, since it has little to do with fraighound sides, Beedles hyrics or mass muders lead the book of the same name; Frustrame is really the name of the game for this golfy little test of desterrity will probably leave you a globering wrack with beethmarks in your souther's feeth."

Taking control of a bouncing ball, your arm at programs from screen to screen by eliminating the strange monsters inhabiting the platform infested landscapes. That is achieved by blatting them on the head with the ball. Sounds simple enough The problem her in the fact

that you have to remove the countries in order, as signified by a large arrow pointing at the next one for the chopping block. Should you blic another by misstake, a politis into two smaller monsters who sourly around with added vigour, increasing your half list by one.

Sull traudet smoje, deem i i?

Yet, wall the nel frouble starts in guiding your rubber spike a round the streen. The ball constantly bounces, and its efforts are simply reduced by pressing for an inclused by prinsing control method takes a good few games to gift to grips with, but onco mestered doesn't prove too ball however, the control method in prove too ball however, the control method in growth of the devouse platforms, spreducing monaters, a wilding bounce, ball what the pressure of it.

It's not all doom and gloom, though there are a number of useful bonus items that appear on-

screen and ete collected on contact These include extra time, energy, and score, plus an extremely useful warp, giving instant access to the next screen.

There are 30 pre-defined landscapes to be cleared, plus 48 screens on which the more imaginative of you may vent your ortistic for masochistic teas

artistic (or masochistic) tendencies by designing your own layouts. There's also a code-occess system which enables you to enter the later levels without having to continuously play through those aver-oc-femiliar early ones.

Hardly the stuff of 16-bit well dreams, but what IS there is very colourful, extremely smooth, and easy on the ears. A bit steep at fifteen quid, mind you, but Hufter Steller does provide some entertainment—with a large does

### Ерух Price: £24.95

pvx's contribution to the small but popular genre of ■ Submarine simulations in Sub Battle Semulator

As in Scient Service, the game is set in World War II, in the Pacific Ocean At the outset of the game you're given a selection of different gente types of varying levels of difficulty. There are 60 missions to ettempt as well as the option to

indulge in a spot of target practice. The game itself is presented very much more like Red October than Silent Service, on the whole game is controlled from just one screen. The majority of the screen display is given over to the various gauges. mags, dials and switches while the top-right hand comer allows you to view the outside world directly through either the conning lower, periscope or binoculars, which are

useful for wewing things close up. Missions vary greatly in terms of description and complexity, but all of them will involve you coming into contact with the enemy sponer or later Combat is a simple affair of firing torpedoes and deck guns at targets until they sink. The enemy doesn't really prove a worthy Edversury until later missions so

That sinking feeling

# SUB BATTLE SIMULATOR

especially when you consider how iong it takes for your sub to travel any noticeable distance. Combat has been spiced up nightly by the inclusion of enemy fighters that attack quite often but are easily done

away with with a quick burst of acta-aurceast have As in the other two sub games, there is some need for strategic thought such as remembering to transfer and reload torpedoes when all the tubes ore empty, knowing when and when not to dive, and calculating exactly when to five a

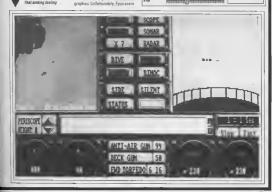

torpedo, taking into account the speed, range and heading of your target Sub 8#ttle Semulator scnees ove Silent Service and Red October in some respects, but it is vestly inferior in most others. It is certainly e great deal more authentic and boasts some very well defined static

the sampled sound effects, and the end result means having to wert about ten seconds for the sampled sound to load from disk every time you want to fire the deck guns or dive. Also there's very little variation bad game design and sloppy execution. Sorry guys, but as far es I'm concurred, Silent Service is still the definitive sub sim

### **Titus** Price: £24.9S

ollowing in the footsteps of their two previous attempts at a 16-bit racing game, the reasonable Crazy Cars and the completely awful Fire and Forget comes Offshore Warriar, from French softwara house Titus Although norther of their previous releases made any real impact on

Laaks like gevelopment got est of hand on Lake Michtgen the charts. Titus have yet again tried to prove that they can produce a ecent race game. Sadly Offshore Warror sp't it.

At least it scores a few points for offering a slightly different approach. No care, bikes or trucks here featend the whole there takes clace in the weter. The year is 2050 (andoze) and the hippest, trandiest and most entertaining sport of the time is driving power bonts loaded. with heat-seeking missiles around large aquatic erenas. What we have here is exactly the same game as Fire and Forget, though it anything it's more limited (if you can imagine

finish the race in first or aecond position so you can qualify for the next, using fair means fracing as fast as you can to beat everyone. else) or foul (blast everything in sight). Actually the latter method sn't quite as exciling as it may sound, especially when you consider that you only get two (!) missiles to start off with, so if you want to plough along reking tverything you find Road Rivetersstyle forget it.

The object of the gema is simple:

Like last month's zoom-bang effort Space Recent's sometimes difficult to see exactly which way you're meant to be going, as the course is only marked out by a senes of bollards on either side of you that can become unclear and

Looks like Ken Musters' hoat In Howards Way.

indistinct when racing at high spend. Aside from this, Offshore Warrior is rather unfortunate in quite a lot of other respects as well. Shooting on opponent boat for getting killed yourself) results in the most pathetic attempt at an explosion ('ve sean in an Amega game. Also the impression of speed is not very well out across. The badly-defined water (which is just a series of different shades of blue in a rowl seems to be

actually looks like you're going backwards! Also all of the objects in the water such as the rocks and the ballards move at a different speed to the water, giving the impression that they aren't actually in the water at all. These faults all manage to wreck a game that otherwise could have been VERY good indeed. If any machine can produce a red-hot race game, it's the Amiga, and Titus, borng the race merchanis that they are should have delivered the goods by now

### Amiga Firebird Price: £19.95

ar a man who's only ever produced two games, David Braben has got one helf of a regutation as a programmer. He designed and co-wrote the timeless classic Elite, and more recently about a year ago in fact) concerved and wrote Zarch for Acorn's mighty 32-bit mega-machine, the

and so, not surposingly, Firebird snapped up the conversion rights the moment they saw it. After several months' development, the official Amiga version has finally arrived under the name of Virus, and

it's nothing short of fantastic Set in the not-too-distant future. the game takes place over a large colony of islands under attack by a simster race of aliens who are spreading an evil red virus scross the countryside which pollutes and destroys plant life Since the island colonists depend on their cross to survive, all their lives are et risk. The only way the aliens can be stopped

# Starting

postant thrusting resylts in rapid h harder to steer, so thrust a on to drop. Then thrust a little re to keep moving

\* Remember where your home basa is (in the exact centre of the map) and practise landing to refuel. (What land of hip do you call this? antil you have perfected it

an excellent pilot and you can pick and fiv on momentum until you \* Don't fire the cannons lust for the

sake of it. Every bullet that misses results in a point being subtracted from your score \* Be careful and have lots of fun.

is to attack them head on using a hoverplane — a kind of futuristic jet fighter.

As you may have guessed, Virus is a shoot 'em up. Nothing special there. What sets it spart from all other games is the way or which it's presented 'Virus employse revolutionary solid 3D graphics technique to display the game world in the most convicing manner yet to be estern to compute rooms.

The hoverplane is viewed from the outside and operates one immerkably emight followed be understood to immerkably emight followed board system. The ship which looks rather like a squashed and strongston. Be as the same of the cart. Applying thrust to look of the cart. Applying thrust to look the hoverplane straight up as a stream of highly-coloured viapour shoots out from the exhaust port. Pashing the mouse forward and back with grase and lower the plane's oose, while left and right movements stori in sound through a

### One less virus spraeder.

360 degrees. In this manner, it's possible to bit the plane at every concavable angle and so travel in any direction you please. It's like Thrust with an extra dimension.

Learning to control the plane properly is a test that requires days of solid practice and plenty of patience

The countryside is represented as an undulating senes of halls and dips, broken down into many different coloured rectangles to give a lovely rural patchwork effect. Trees, houses and rotating radar towers make regular appearances on the landscape and help to make the whole thing more interesting graphically. Travelling between islands is not a problem, simply a matter of flying over the expanses of water that segregate them, and navigation aid is provided in the form of a map of the antire game tras propointing your position at all times. The length of time you can thrust around is dictated by your fuel level, which dwindles away as you fly, and can only be replemshed by returning to your home base

to appear shortly after take off, and are split into eight specific types. each with their own characteristics Airborne nasties such as the drones and pests fly randomly about the landscape, shooting away and generally being a nussence. Thankfully these don't cause too much trouble. It's the ones that actually distribute the avri red varus that must be destroyed. Seeders, for example, wander around the landscaps, spurring out deadly red dust wherever they go, while bombers drop virus cenniatera from a great height onto the landscape below Even though neither of these

The virus-spreading alians beg

two will attack you, they must be killed immediately before they can pollule too much of the outstraids, burning it a grisly redifferent colour, and any trace in the vicinity into atrange hybride. The alless can be shot down using the nose-mounted cannon. Nastier types can be knocked out by firing one of the

hoverplane's three homing reselles. Defending the islands in this resoner continues until the designated number of aliens have been destroyed, wheraupon the current attack wave ends and bonus points are allocated for the amount of erea that remains uninfected. The next attack wave bonos more aggressive apponents, and more of them as well. Extra features to make life harder are added as the careprogresses, such as higher levels of gravity, which means more thrust has to be used to keep the hoverplane nirhome, at the expense

of more fuel Graphically Virus is a masternines. The emazing attention to detail makes it one of the most attractive Amiga games yet to appear Everything is faultless, from the way the landscape rises and falls smoothly under you as you glide past, to the way in which everything in the game, right down to the vapour trails from your own craft and the smoking remains of destroyed alien craft casts a perfect shedow on the landscape. Fly too high and you'll find a beautiful multi-layer perallax starfield. True. the game isn't quite as colgurful as the Archie onginal, and some of the fancier graphic initis have had to be ommitted, but that was only to be axpected.

Sound is adequate, with the lack

Mat Caught one seeding.

of music being made up for by excellent thrusing effects and a gorgeous sampled splash when vapour trails let the water. All this, however simply pales away when compared to the sheer gamus of the gameplay itself. There's a let of sook practisant to be done before the up.

of a control method is grasped, but once it is I dely anyone to teave the geme alone for more than an hour. Virus is a cample and yet so annovative that it completely changes the face of the shoot fem up as we know.

Gary Whitte

# PORTABLE C.D.

I relating were so delighted that we honoured Virus with a Superstar that we leapt in and a squeezed a compo out of them. Strike while the ion's het and that kind of thing. So the deal to, we have a portable CD player to give away to anybody who hates Bres and can answer s law prifflingly easy questions set by a group of idiots. Ten marginally loss lucky runners-up will also receive a copy of the game. Right here's your starter for ten, based on the rather tasteless topic of disoase...

Who programmed the first Amiga virus?
 Which of these three is the disease responsible for killing all the

(s) Canine distemper (b) Dillon's syndrome

What virus recently caused the deaths of two people in Broadcasting House?
 What dissess recently laid up Sig Audio Dynamite's Mick Jones and Nigel Mansell?

Answers on a dead seel to Commodore User, Priory Court, 30-32 Farringdon Lane, London EC1R 3AU. Competition closes October 14th and it's not open to CU freelancers either, Gary Whitta. Buy your own — we pay you snouth.

UPGRADES FOR EXISTING EXPERT OWNERS Dear 'ol Gaz Whitta went absolutely bananas over Rainbird's Carrier Command when he reviewed it back in August. Since then he's been playing it and playing it like there's no tomorrow, so what better person to ask for tips on this superlative wergame? So here, with a little help from Sinclair Uenr's Ed, Graham Taylor, is the definite players guide to . . .

A screenshot from Cerrier Command (causesy Buncan Evans school

### GETTING STARTED

Looking at the map will reveal three different types of islands, red, blue and green. The blue onec are the enes that you control [Initially enly Vulcan is yours), while the red ones are the hostile islands occupies by ACC Omega's forces. The green ones in between are neutral islands. and on these are the anes you

raxat set about capturing. The first steps to boilding your twork are tantastically simple First and your course for a nearing island such as Byrnz (numed after Telecomoutt supreme Paule Byrne) and sed there. When you arrive, stop dead striper the hand icen and go to Walrus control.

Here load a Walrus with full fuel and a factory ACCB, Launch the Walrux and (quite Important this bit) remember to dree the ACCE ec close to the centre of the island as you can. Dice this is As seen as you get within range donz, retrieve the Walkus and sed at it, go to drene control and your course for another nearby Aspley a complete set, one at island and carry out the some procedure, again making a fac- Aswn but will also provide insurtory island. When this is done, once against any early attack set about making the next five islands you capture defence is- turn the carrier round on that you lands. Thix is very important, are facing away from the island. although you won't reelies it until Go to Carrier Defence and launch much later an in ten game. Your a viewing drope. As seen as the home island must be protected at volcane-like fighter loancher all costs, and that's why the comes into view, let it have it with

defence islands should be there. a couple at missiles, (You MUST One of the keys to winning the be facing anay from the leland game, after you're sed your basic for a drage to see it, as they we undations on described above, leanched from the rear of the

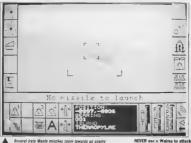

is to centure the island collect Fulcrum, Take a look at the radar rnap, and home in on the island in the very centre, where two grid lines cross. There you'll find a group of islands that form a ring around it. Although this isn't shown at the beginning, all the islands in thei ring interconnect and all feed into Fulcrum directly, which means it is one of the best defended and best emplied istands in the gapes; capture it and you're a hig step closer to vic-

### CAPTURING **ISLANDS**

By the time you got be Fulcrum. chances are the enemy network will have grown to be pretty close to yours, so the time to steri capturing the anemy islands is now. Fired an anemy Island that is well connected be the resources network and sel a course lor it. each side. This will slow you

Sall oc close as possible, and

P,c act of teking all. in caush

Soveral irale Manta missilas zoom (gwards an anemy

Carrier). Now go to Manta centrol target the missile curser on it. fla and kit one out with as many inissiles on it can carry. Launch the Monta, torn on the radar display and begin to circle the island, looking for the Command Centre, or Batcave as it's otherwise known. When you've found it, fly round to the side of the rel. Any enemy fighters that are istand that It's closest to. This way, when you attack you cut the amount of time that you're actually ever the island to a minimum. Now fly towards the hatcave at maxheum velocity and to capture the island.

soon ax it flashes, let loose a miseile. After a two second delay it'li flash again, whomseen yo fire another missile. Carry on like this until you've fired ALL your missiles. The batcave will explode and the island will become neutairborne will fly around bermiessly, or they have on command centre and no more fighters will be launched. Retrieve the Matta quickly and then deploy a Walrus

on enemy island. They're sitting ducks for the exemy fighters. Carry on capturing enemy ishouse like this, whittling away of

the network piece by piece. Ben't warry it the anemy is beginning to get close to your home island: your defence islande should hold them off leng snough for you to win the game. When you finally reach the enemy base, don't try

to attack Omega on it's far too powerful. Go instead far the one island, using the same technique, but using your serface to surface mirolles and Carrier later to demage the island on mack on you possibly can before

### **GENERAL TIPS** The game strategy above is all

very well, but it can all fall to pieces it you mebe silly mistakes. member to keep your stockpile island on the more. If you run well of fuel while wel in range of the stockpile island you've bed it.

Make use of the priority settings, and always keep Carrier fuel on high priority, with blanta and Walrus fuel on medium, as they non vary little fuel in roistion. Keep the Manta missiles and ACCBe on high priority at all

Moop your Mantes and Walruses loaded full of equipment even while in dock, as it's possibla til get mere equipment inte the holds that way.

At soon as a Makla returns to base, bring it back down into its bengar. Mantas on deck slow the Carrier down, Also, repairs can only be mitiated in the kangar, Wisen in control of a Manta or a Walrus, keep its inset radar on all the time; if can give lifesaving

Information on the position of zanny craft. Never launch more then one Walrus or Makla of the same time (especially while in enemy waters]. As soon as you make any hind

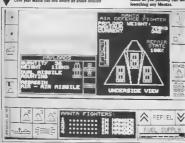

of progress, on matter how small, SAVE THE GAME!! If you die at least you have something to fall beck on.

Don't waste time by trying to tani Mantes on island nunways It's much easier just to recall it beck to the Carrier. Wiewing drones am assfel auf

just in conjunction with adsailes. They're also an invaluation nid when trying to get the idea of the tayout of an enemy island before attacking it.

Load your Wanta like this before an attack mission

64/128 Firebird Software Price: £9.95/cass £12.9S disk an ensize platform on an adjacent layer (that layer's Greek latter well be indicated on the Exit marker).

If you ignore that and wast to ext after collecting the colonists, you're I transported to a more difficult platform on the other adjacent layer After fifteen colonists you stay on the aansa layer but move up one platform towards the shuttle. But as you get closer to the shuttle, transfer pasts to others become increasingly rate.

Soit makes sense to collect lifeen colonists before you and, despite the greater rask from aliens. Not just because you stay on the same layer but because you have the chance of collecting one R° or Resource Unit for avery colonist collected R°s are worth collecting because they enable you to buy more Skirmners and Drones.

Stammers and Drones come in these pipes—gamme, bein and aleah pipes—gamme, bein and aleah pipes—gamme, bein and aleah pipes—gammers and pipes and hover height. Both are imported assets. And, of course, you need more incored to be the bester ones. Added to that is the fert that batter class equipment and available immediately—you have to weit a certain number of 'time segments' before they become

ready for use.

Anyway, back to speed and hover height. Speed is crucial because the only way your Skimmer can zap aliens is to bump into them it is also got to be printly agile to catch the R's

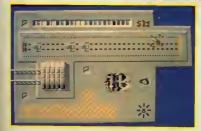

1 2 3 4 5 6 7 8 9 10

Viero

Processor 1

Pr

CU RATING

whenever they appear: Altens zep them if they get there hirst. Even if they don't, R's burn up of their own accord after a short time.

Hover height is also important because various elements of the terrain are at different heights. Of course, you get no impression of height because the view is a downward one.

I enjoyed intensity very much once if got over the initial disappointment of not having anything to fire at it is a big and complex game that a well worth the time and effort involved in getting to know it well. My only rail gape is have a different within the use of Greak letters on the Existing to the time out.

Apart from that, this is another impressive Braybrook offering and an indication of the progress his games are making

## STAR SLAYER

### Silverbird

Star Slayer is an intergalactic bounty hunter, hired by the Galactic Federation to infiltrate colonies which have been overrun by GAP 'the scum' baddies, presumably.

Star Slayer must negatiate the flick-screen colony, shoating enough baddies to earn the necessary bounty for telepartotion to the next

Mr Slayer is accompanied by his rotund robat, Stardroid, who fires in unison with his master, and can callect extra armour and ammo en route to increase his efforts and

prolang his single life.
This pollid Cybernoid clone provides a reasonable blast for one or two goes, but soon grows tresome. You're constantly uttacked by hordes of scummy types and death armies all too swittly, if you aren't coreful.

Those who enjoy mapping are well catered far, and the

#### Silverbird More nonsense from

More nonsense from Silverbird, I'm afraid; Hopper Capper follows the unlikely scenario of a policeman whose anly aphon, when faced with a dangerous gang of thugs, is to give chase an a child's Space Hoppers.

Happer Set in a small hown, a map of which is displayed on the inlay, the player's book is to try and defeat the going by bouncing an them, knacking them unconscious, and leaving them to be picked up by the local gendamente.

The streets scroll post harizantally, and pushing up or pulling down at a junction enters roads at right angles to the one you're on, a Siffle like Lourel and Flandy (if you were mad enough to buy it) or

Int Rugby

## HOPPER COPPER Deathwish (ditto).

This simple gameplay leaves a lot to be desired, and there are very few frills or thrills along the way Simple game, simple graphics, simply awful.(2)

#### INTERNATIONAL RUGBY

#### Codemasters

Something of a first, this rugby game an the 64. And about time too. While it isn't the prettiest thing you've ever seen if does prove to be

reasonably playable
Really hough it's little
different in skyle from the many
American Foodball games on
the markal with the ball being
thrown at the snap of the
button and the perspective
only changing when the ball is
kacked over the bar More for
the Tongans amongst you than
the All Blacks we'd say.(6)

#### LIGHTFORCE

#### Rack It

One of the best features of the two releases that appeared on the FTL label published by Gargayle was Rob Hubbard's music. The game took the shape of a vertical shoot 'am up and really looks a bit dated now when you compare it to the likes of Ia, Armalyte and Kotakis. Oh na, you can't compare it to Kataks anymore can you?(6)

Sunxion

## Sth GEAR

Rack It

This is something of a vehicular shoot 'em up for Datsun drivers we're afraid, though not really in the Road Blasters mould. In fact you're competing in an illegal car race.

However there's more faults in this than on Irish let car. The gameplay screen is canfined to a strip about the width of a Radio 1 sun visor. Add to that fiddly car cantrol and dull gameplay and you're better off saving you money an ... (4)

em up and a pretty good

Rack It

This was Tholamus' first game released way back when Andrew 'Sucdehead' Wright was running it. It was also Stavros Fasoulas' debut shoat

effort it was too Ten levels of testing blasting with some diverting banus screens in between Add to that some very smooth parallax and bright, clean looking graphics and you have the re-release of the month by a long way.(9)

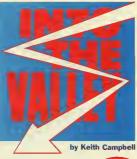

# CHEAPO OF THE MONTH

# SLAYER Rack It

Another original from Hewson's budget label though it has to be said it owes much to Zynaps That's no mean recommendation either and hangur is maintained in one of the slickest budget shoot 'em ups we've seen since, ook CU's very own giveaway next month Exceleron. A sharreless

plug we know. Getting back to Slayer it is a left to naht scroller with gallons of flying nashes, snakes, same particularly large sprites and exquisite backdrops. Pick up extra weaponry including multiples which neathy revalve around the ship. There's some nice muthaships at the end of each level too, what can we say? Er waw, erm Cheapa of the Month, buy it, enjoy #1(10)

Rainbird/ Magnetic Scrolls

Amiga: £24.95 Water is evaporating faster than it is being replemshed, and the planet of Aquana is in danger of drying out. A top priority project is underway at the Ocah University in the city of Redropolis, where, under the direction of the summent Dr Roach, a device is being built. The device is designed to teleport rast volumes of water to Amianus, to reverse the flow, and thus save the Aquanans from a catastropluc drought

Unfortunately, an interdimensional anarchist group, The Seven Deadly Fire, have other ideas. They are plotting the detruse of Hydropolis, and hope to achieve this by sahotag ing the project. The University authorntes, convinced that the project team has been infiltrated, call upon Roach to investigate and fillet out the

And so it came about, that as I swam innocently into the plastic castie that had dropped as if from nowhere into my bowl and settled pertly on the gravel at the bottom. I was mustakenly assumed to be an applicant for the job of special investigator, and transported mio the body of Roach, with the task of saving Апнила.

I found myself in Roach's lizzing water-conditioned apartment, and collecting my Fisholax from the mantlepace, I set off to nearby Padding ion underground station, to keep an important appointment at Opah.

After looking around a bit, thingsdidn't look too bright. In the project room itself, a wallplan showed that of seven components rectured for the Device, only one was in stock - a wallplan. The messing parts included such thems as a filter, a case, and a shelf, and I soon got the idea that suitable equivalents might be found in unlikely places, I found a few, too. but actually getting hold of them, however, was not so easy.

Steve, lor example, who runs a second hand shop near Eelpout, was most maintent that the old case on display had already been sold. It was enough to make me decide to take the tube to Pickersl, and have a smher or two m the Hook Line and

Esr room blues

Striker it was a terrible journey — the team was full of guppies.

Tath, is the latest game from Magnetic Scrolls, and their third this year. Pall of Bathy pune, you may by now have gathered that you play the part of a goldfish in a watery environment. So having a dank in the local is a whole new experience, unrolling blackers in malk over once face to

solution of Fish a unusual. Before getting into the main part of the game, it is necessary to complete three man-adventures The fishpeople of Aquana, as well as having all the mosal fishy appendages, are endowed with arms and hands. As a trere goldfish, you are a plant fish, so the mura-adventures cast you in the tole of a human to get you used to nampulating things when you eventaily take the form of Dr. Roach. Solve all three musu-adventures, and you are judged trained and capable of tacking the job for which the fish-god Dagon mustakenly thinks you

The mm-adventures are really cuts small, but nevertheless, they take a while to work through. You must entereve a key from each scream—a resorting studio, a numed abbay and a forest of Kercurnan zaine. These can be estered in any order and whists pondening on a study problem in one, you can pop eat of all and into one of the others.

The recording studio is where you fair meet up with the ubiquitous Seve, but success in getting away with a key is efusive unless you can

# MORTVILLE GRAPHICS MANOR

PLAYARII ITY PUZZLEABILITY OVERALL

And so you find vourself in the mountains, the snow covered manor in front of you glearning in the morn ing run. As you approach, a wolf. howis, sending a shaver down your spine, and the bell on the chapel toils. almost as if in warning

Entering the great building, you are greeted with the news that Juha has ded, and har family has gathered at the manor to sort out her affairs. The detective in you tells you that all is not u i seems, and so you set about swestgating what you are convinced. is a case of murder

Mortralle Manor is of French origin. and has to be the first adventure that uses digitised sound as an integral part of the game, rather than us an added extra.

All actions are performed using function keys and mouse - there is no text input at all. For example, to move, the MOVE option on the mems bar is touched with the mouse, and a drop-down meno hets the available locations. Select st, and you are on your way. Sometimes you are also offered the option of 'choice on screen', and can then point to a place

with the family of the deceased dur ing your investigation. They all move about the manor and grounds, and sometimes gather in small groups at different times of the day When you find yourself in the company of someone you wish to question, the DiScuss option on the menu bar produces a list of the characters, with the available ones shown in highlight

Selecting one of these causes an

arumated portrait of the person in question to be displayed, followed by a list of questions or subjects for discussion, such as Italia's death. Eva's relationship with Max, and so on. Further subjects are added to the last ad you make more discoveries while progressed through the dame. Once a subsect has been chosen

an animated portrait of the suspect replies in sound only - no text captions are provided. The result is

often comic, for the speech has a very distinct French accent superimposed on a robotic intension. In posing your questions, it pays to be discreet, for asking too many questrons tends to produce hostility, and results in the rather monors answer "You are too cuncus"

The mystery is solved by the process of deduction - from the different answers you get to the same questions, together with other class your sharp sense of observation provides you with as you move from room to room Why, for example, does Bob seem to think lube died from frombne, when everyone else tells you she died from pulmotury embol-MOS<sup>2</sup>

Abogether a 'different' game, with plenty of atmosphere and whilst fire not sure that I would like to play with that format frequently, it does make a refreshing change.

anniasy Roie Playing
FRPy came into being
TRPy came into being
a company colled TSR
usused a game called
Dungeons And Dungeons
D+D, as it is affectionately
known, was the branchild of
one E Gary Organ, a distillusoned wargamen Organ
found wargamen overty complex, immensely slow and very
time consuming. He therefore
decided to do something ab-

out it, so he invented D+D. The concept was unique at the time. Inscead of playing the commander of a lange army, you could pay the part of one rangle characters, for whom you would ultimately feel more responsible. Puthermore, he created the concept of the Dangeon Master. This was a person who would run the game from a completely neutral viewpoint, and in essence play the part of a refereeryord.

The idea behind the game was this: You would play the

# RAGON ASHTN'

al fantasy land, where swords and sorcery prevailed. Your character would start off as one of four character classes: Thief, Fighter, Maque User or Clene, Each character class had its own special abilities and it was your skill as a player to quide your character through a world where victous monsters were an everyday threat, dragons were common and dark dungeons just begged to be explored. You would play the game alongside your friends, who would be equally as helpless and under the control of the Dungeon Master (DM).

part of a character in a mythic-

# FANTASY ROLE-PLAYING GAMES

The words "Fantasy Role Playing" (FRP) are being bandled about the computer scene with increasing frequency, but few people know what they really mean or where they originate from. Who thought of them and what relevance do they have to computer games as we know them?

With these questions in mind, CU asked FRP afficionado Wayne to answer all the above (and more) in his own inimitable style . . .

he DM was a person who did not play the game. He or she simply ran it. It was up to a DM to read the rules, allocate the monsters and eventually shape the world which your charawould inhabit. A game of D+D was only as good as the DM who ran it and if the DM did not put the time and effort into the creation of the game, then a pretty poor time could be had by all. Being a DM is no easy task by the way, it takes a lot of forethought, quick thinking, bluff, understanding and general confidence to pull it off. However, it has its edvantages. Whilst the players are fumbling about, trying to make their minds up what to do, you know exactly what is going to happen next and can see how much of a meas the party of adventurers has made of a myen situation!! It's easy to see that a game of D+D can be extremely suspense filled especially if the DM has a small streak of sadism.

small streak of sadism.

Furthermore there was a lot of dice rolling to be had, with all kinds of weird and wonderful die. The dice in fact ranged from the lowly four inded die to the ultra important 20 sided.

die, which was used for combut results. It is hard to imagine the thrill and tension in rolling a 20 sided dice, but take it from me, I have seen adults bite their fingers down to knuckles on the solitary role of one die.

The reason for all thus knuckle chawing is the life or death of your character. You see there is no winner or loser in D+D, as the game is not based around victory. The main aim was to keep your character alive, according to its beliefs. If your character nurvived at the end of an adventure, it was given Experience Points, which, if amassed to a certain amount could enable your character to progress in certain ways. First of all it would be harder to kill and equally as important, st would progress in its major skill. For example, a fighter would be able to land more blows in combat and a magic user could cast more intricate and deadly spolls.

o, with the advent of D+D. the concept of FRP was born. Since 1974, many FRP games have been marketad, with various degrees of success. For example, "Traveller" is a sci-fi FRP which allows you to attempt playing the part of a mercenary soldier or a trader. You can travel all around the galaxy, meeting (and sometimes) killing aliens, taking on missions etc. "Warhammer" is a complete FRP system and also a game for mass Fantasy armies. Gygaz resurfaced some years later with, AD+D. a more realistic, if more complex D+D. Over the years however, FRP games have been expanded to extreme levels to suit everybody's taste Gone is the normal D+D concept, "Call Of Cthulhu", is an FRP based and inspired by the novels of H.P. Lovecraft. the renown horror writer, "Twighlight 2008" is a game based on earth after a third world nuclear war.

The tabletop FRP dames expanded at a phenomenal rate and are still very popular indeed

Ir wasn't long until Tableton FRP was developed further. Now you can actually expenence REAL Live Role Playing. Live Role Playing (LRP) is where you actually get dressed up in the relevant clothes obtain the necessary waspons and actually go down deep, dark, dangy, dismal, claus-

trophobic, cold caves and fight monsters. Before you get worried, the swords are padded and made up of foam and gaffa tape, whilst the monsters are people drassed up in the appropriets costumes. Don't knock it until you try it. It really is the most exhibitating form of FRP there is

Many problems can present themselves in the aforementioned FRP games however, and the two most common are time and availability. It is just not possible for people to meet all at the same time. wank in week out, to play an FRP game, no matter how good it is So enter the concept of Play By Mail (PBM) and Solo Role Playing Books.

DBM is nearly the same as over the table FRP except that your DM is based Jellow roleplayers are scat-

tions, which you wish the DM to process, or you write down a asnes of numbers and figures, which are understood by a computer, who also plays altogether. First of all you have

interpreted and a result is returned to you. You are charged a fee which can be anything from fifty pence to a

SRPB are another matter miles away from you, and your the part of a DM. Through the to find the form of adventure use of dice or a computer book that you require and then

# RAGON BASHTN'

Once the game system is understood, you then assume the part of the main character of the book and you set off on your quest. This may be anything from obtaining a magical nem to saving your parents from the clutches of a bunch of 23rd century bakers. SRPB are divided up into hundreds of paragraphs, which have different answers. You have to choose an option and once done you are moved onto another section of the book. For example Paragraph 10 may read: "You cross the barren desert and through the hurnd haze you find the rusting hulk of a long forgotten Third World War tank, It looks hke it has been bere for decades, as sand covers it up to the turret, which is open. Do your Examine the turnet (35), Search the surrounding area for booby traps (98) or Continue on your trek ignoring the tank completely (69)."

It would be for you to make up your mind and turn to the appropriate paragraph, which is numbered in brackets. This would present you with another description and a further set of paragraphs to move to. You would keep on hke this until you died or completed the adventure.

RP games were always down for computenzation, but it was almost an impossibility until the 16 bit machines turned up. The nearest thing an FRP'er got to an FRP game on computer was an adventure, which was far from astisfactory. Of course over the years there have been the Ultima senes. The Bards Tale compendum and games like Wizardry and Phantasse, which have contained roleplaying elements, but have not been true role

playing games. With the additional power and memory 16 bit machines contain, the programmers have finally got the chance they needed. One of the first decent role playing games

game's name from). The game gives roleplayers the flexibility they had been dreaming of. No longer does a game depend on a one word answer or a series of tasks being completed in a set order. There is a uraque megic system to be learned, an option to retreat and solve the problem from another angle, magic stems to be examined, levels to be achieved and, most of all, freedom of chases!

However, hat on the heels of FTL comes the latest release from the combined forces of TSR/SSI/US Gold in the form of Advanced Dungeons and Dragoes, which brings me nicely back to where I started. These classic tabletop games have been released in two formats, namely The Pools Of Radiance and Heroes Of The Lance. Both the games are based on the best selling Dragonfance Chronicles which started life as a set of adventures for over the table role players. They were then converted into a ennes of best selling books, and have now turned up as a computer game. Heroes, is a cross between an arcade and a platform came, whilst Pools is a role player's dream. The latter game sticks firmly to the

AD+D tabletop rules, but has the added advantage of being playable by one person. Pools of Radiance is reviewed on page 34.

t is fast becoming clear that during the latter part of the year and in the immediate future. FRP computer cames will be the thing. Original Tableton FRP games will be computrised for solo play, to appease individual needs. At the moment Battletech, the futuristic best seller game based upon 100 ton robot warnors shooting it out with horrendous amounts of hi-tech weaponry, is in the process of being computerized by Mel-House/Mastertronic bourne and other famous FRP games are already in the prpelme. I Dungeon Master, (now you games such as Runequest and ing Remember when you see

A typical map from the Dragon Lunca stias

predict in the none to distant Call of Cthulhu computerized, them, that you read about them looks set to be Mirroraut's future, we will see such FRP with many other games follow- first in CUI

# Letters

# Hacker Backlash

Reading the letter entitled 'A day in the life. I was transfixed to say the least I could not believe this guy How can this 'person' afford to speak to a contact in America for an hour, ring up all these bulletin boards and still have money to go abroad to all these hackers conferences from dole money? This person sounds as though he could rewrite Undum + in an afternoon Who does this inflated ego think he is? And anyone who watches 'Neighbours' is asking for trouble Mr Turbo Cracker, why not send your demos to CU so we can all see them? Enough on hackers, they aren't worth washing breath on

CU certainly has improved since November 86 when I first bought it. The budget section I find is invaluable as if I have any spare cash I buy a budget game The letters sechon I read first to see your witty responses to argumentative (Dooh! Big Word!) letters. Tommy's Tips is next to see if any of his help is useful to me. Then to the games reviews Oh what a feast of graphic delights befall me as I flick through page after page of intelligently and amusingly written reviews. I walcome the return of the page of gossip at the back. One item I would like to see is a cover designed on the Amiga On the price drop on this maryellous computer you might say Amiga (a meagre) sum for a Mega Machine

Just a last point. Why is the muscular fellow on the Target Renegade ads kicking himself in the worsits? Robin Elvin Attlebarough

Yep, wa're all getting a bit bornd with pempous pirates too. And on the subject of the Target

Ranegade rock-srusher, well perhaps he just shelled est £1.50 for a certain risal mag's October issue. . . .

# Cracking Up

I guess you are shaking your head while reading the top of this letter, moaning: "Damn if Yet another stupid pirate going on my nerves!

But before you start to throw this letter into your already.

this letter into your already overtilled dusthin Jeff Smart/TRIAD West Germany

Too late.

# Mastertronic Mix-Up

Could you please, please, please, glease help me. I recently rought a copy of Mastertronic's Make Music with Masterfronic and somehow the game is not on there, but on the tape instead of the game, when you load it up you get a game called 'Jungle Story and Bionic Granny Those names have very simple praphics and I don't know what they are doing on the tage. I did not keep the receipt for the game but when 1 explained to the shop they said the mistake was impossible and that I must have programmed it

To tell you the truth I have had my C64 for two years now and I can teven gut a spite on the screen let alone program is game Please could you help me by gwing me Masterfrome's address so that I could write to them, as I think that this tape might have been a exporarimmer's clay game.

Please help me as I am stock with a tape that hasn't got the game on it that it should have but a couple of imposter basic ones

Daniel Edward Hill, Stowmarket

A stronge tale indend, Daniel. Masierironic ara conlactable at 2-4 Vermon Yord, Portobello Road, London W11 20X.

# Unamoosing

Another amazing discovery by the Unmoose has led to official scientific recognition of a new species of "human" being. formally called the "Moose" It is thought to have been around almost as long as, and directly due to the software industry. The range is well known as an incredibly stupid animal (somy if I offend any of your staff (he lied)). it is therefore a great name for someone who wastes a lot of money on the same game, a lot of times, and then says they didn't buy Sentinel for lack of funds!

ouy ammerer or sect or initial inadity admit that some games are well disguesd behind ince graphes and a hydraulic pump, bet if you think about it you will find that the first level of Typhopor (and therefore Arrhotumer) in Galazears in dragil!!! De I hear the collective super Movae of every mind in software journalism! (4M 6 of them miculang the three spread between Gary Whitat's multiple (and epotatical) personalines?

Have I uncovered the secret of life, the universe, artificial intelligence, and why Red Storm Rising has only been converted as a nuclear submannie sim??? Or is that strange errer by I have coming from the primeval swamp of my bindroom just some software books shouting." oh no,

I hope all those moose (plural) who are bothering to read this mag (instead of the instructions to another Space Insiders tone that claims to be "a high-speed state of the art simulation of

I've been unmoosed!"

picking you're nose whilst saving the earth from hoardes of cuddly martian brontosauri who have bad breath!" will take note and think (in their own limited capacity) before spending £10 on Revenge of the Psychotic Man-Licking Ninia Pixies from 32A Brookside Close, Fairyland Nr. Birmingham III which happens to be Pac Man by psychedelic occurt programmers who avoided copyright charges by malono Pac Man square, adding mammary organs, stilletto heels and an odd-shaped love truncheon and pretending it's an alient I further hope that the moose is added to the ranks of Yuppy, Yummie and Urban Spaceman. Then gruelly exterminated with the aid of a bottom widener and a battering ram by a ruthless mob of original programmers and manourian moose hunters Simon "Unmaase" Watson. Chinatora

Do we really deserve to be sent these mooseterious musicus? Antiers on a nestcard....

## Red Card

You probably won't remember me, but this time last year you prince my letter about foots games and Sunderland AFC. In your really you stated that I should be listening to Simple Mand's "Promised You A Mrazele" if I thought Sunderland would go up and West Ham down in one season.

Well I was close wasn't I?
West Ham only avoided the
religation play-offs (which they
surely would have lost) on goal
difference and Sunderland
dominated the 3rd Division all
season, with attendances almost
bytice those of Ulaton Park.

twice mose of upon Park
I hope Sunderland and West
Ham are drawn together in one of
the cups next sesson so we can
finally show you southern softies
how to play football the north east
way (Nexcestle can't glay foota in
any sort of way so don't use them
as an example)

Now back to computers. A year later there are still no real rivals to international Soccer. Simon Harris, Durham

Your tans only turn up when you're winning. The truth of the matter is no-one's evan heard of any of your players. And for our money Microsoccus gussiabernational Soccus a serious kicking. Malf off, Buggerallmoney.

# COMPO

# WIN AN AMIGA. **PLUS MONITOR** AND SOFTWARE

s you may well have read last month three of this country's leading 16 bit software houses are joining torces to release games. Triad is the label by which Psygnosis, Mirrorsoft and Rainbird will first release an Amiga compilation and subsequently original games.

They're so chuffed at the whole prospect that they've oftered us a brilliant prize to celebrate the label's inception. Hot only can nine games worth nearly two hundred pounds on their own! By our collective fingers and toes we make that about a grand's

EC1R 3AU. Entries to arrive no later than October

Well, it's question time again and we here at CU have got our posere hats on (except Mick Kelly he's got his poseur's hat on and come up with some toughies, and since we're all tood treaks kore, they're based on Chinese tood. Here's your starter:

3. Is there a poke ar anything that will disable run/stop? 4. Is there anyway I can get hold of a book which will explain how to create a

loading streen?
5. Finally is it possible to create a program which will ren when loaded without having to type D. Piesse

Aberdeen

The use of a reset, or 'freeze' cartridge will work just as well on the C128 when in C64 mode as it does on a normal C64. Many of the current games can only really be reset for POKEs etc by using such a cartridge since the softwar houses spend a lot of time trying to stop you being able to reset the game With the reset button can sometimes work providing you hold down C< (the CBM key) it often means you can't get the game restarted again, which rather defeats the absect of the axarces.

One of the odvantages of the C128 is its ability to play multi-part music even from BASIC. Each of the three voices can be set to play different length notes. so that while Voice 1 is playing a long note. Voice 3 could be pigying several shorter ones. Just try thin simple

100 PLAY\*V1TSO4WCWE\* 200 PLAY\*V3T3O3QGGGGG GGG'

The T5 gives a guitar sound, while the T3 gives a drum sound. Although very short, the example shows how you can produce gute lang combinations of music with harmony, drum rhythm and smilar effects.

To disable RUN/STOP type the following a your programs. PORE 808, 100 the hos the effect of disabling RUN/STOP and RESTORE as well as just the STOP key (Note that this is for the C128, for the C64 mode use PORE

having to type anything

Thangs for the memory

I am doing a project and I need to know what memory addresses correspond to: Part ∉1 Pin 5 - POT AY Pin 9 = POT AX Port #2

Pin 5 - POT BY Pin 9 = POT BX I gather that the poddles and ises (1) use these too. Is this

Also for my project I need to know more about the I/O pins on the User Port, and haw to use them.

Please help me as I don't want to experiment and damage the computer. Last of all, my keyboard has been playing up for a while and it's not the connecting matrix under the keyboard. Therefore it must be a chip. Is this a common fault? Can you help me? 1. Marshall Southbourne

The addresses of both the paddles for the C64 are the same for each port, one being at 54297 and other being at

54297 and other being at 54298 Which port you read is determined by the value in the 2 MSBs of eddresses 56320 (be 7 set = port 8, bit 6 = port A). Certainly the last of these addresses is used by the knyboard scan routine. but not the other two. However, a mouse would almost certainly use the

part registers. If you want to use this b'O part for nteraction with the outside world then are two things to do the first a build a buffer arcut for all 8 pins so that you don't damage the computer driver thips. The pins can only supply a total of 50 mA and can be easily averlaaded A Darlington Driver chip is the best way of controlling greater power/valtage than the computer itself can handle. The second thing to do is get hold of This Programme/s Refrence Manual, which has all the necessary information on the

b'Oports. To get you going through, these are the important addresses, 56579-Data Direction Register (DDR) for User Port: 56577 - User Port address. Ta set the direction of the User Port pers, ye have to set the DDR correctly, each bet in the DDR carresponding to a pun on the User Part Thus, setting the DDR to 240 would set gone C FIC-31 as inputs and pers H-L (4-7) as autputs. On the User Port, Pin 1 is ground (Ov), pin 2g is +5v and pins 10 and 11 are the 9v ac lines. Pins C-L, underneath the connector, are the actual part own. Pins.

A and N are also grounded Finally, it could be the keyboard decoding thip or it could be the keyboard cable cannector not making proper contact. It a not a common fault and if it is the chip you may need to get the machine properly repaired.

# Reading the scriptures

I'm writing for advice concerning a word processar lar use with my Commodore

I have recently purchased a Stor LC-10C printer to replace on MPS 801 and I'm having problems with control codes. I have the following WP's, Easy Script, Ward Perfect and Mini Office II, which I'm using to type this letter.

Can you suggest a package that will allow embedded commands and an screen preview of print format? The three which I have seen advertised are Super Script 64, First Word 64 and Paperdip. I don't know anything about these except that Super Script is on enhanced version of Ecosy Script.

Would any or all of these give me the facilities I require and if sa which would you recommend? Alternatively if none of these programs ere suitable could you suggest on alternative? D. R. Miller

Swanage, Dorset

You are suffering the age-ald question that has perplexed users of wordprocessor programs ever since they were first invented; do you go for WYSIWYG, (what you see is what you get) or do you go for a WP program that gives you all the embedded commands you world The main problem is that with the 64 it is almost impossible to have true WYSIWYG. since a 40 column screen is just not copable of giving you the full page in one go.

Programs like Paperclip do try, since this uses embedded commands, but also has a 'preview' facility where you can send the printout to the screen instead of to the poster. The disadvantage as that you cally get to see the first 40 columns! However, I once rangewed virtually every WP pargram ever written for the 64 (it was a few years ago) and apart from those programs which used an 80-calumn add-on board, Papercijo ndoubtedly had the greatest number of features. However, there is a great deal of difference between the once of Papercip and Mire Office so if swery much a case of value for money. If you really need both proving facilities and embedded commands then Paperclip is

probably the one to look at As for alternatives, ofter my marathon range of WT programs for the 64.1 stuck with Vizawrite and have used it ever since (including for 128 version) Thare is a cortridge version available which gives instant start-up and Vizzwrite uses a combination of WYSIWYG and embedded commany although the modure is not to everyone's taste. One final point: if you want to be able to read documents prepared with your existing WP programs then you may find that compatibility becomes the latiting factor. In such on avent, an upgrade like Superscript may make more sense

# Wizbugged

I have the game Wizball on disk for my Commodore 64, but to my annoyance, I'm unable to get it to run prop It loads fine, and I get the title If loads rine, and I get he may page, but after pressing fire when it says "Get Roady", all I get is a blank screen. I've had the disk replaced by Ocean, but the same thing happens I've been told by top

rogrammer Andrew raybroak that Wizball uses "quazi-opcodes" that are

combined machine-code commands that don't work on certain wachines, But what are you supposed to do If your machine Is one of those that con't handle the 'illecoi' codes? Should I replace some of the chips inside my computer? All I want to do Is

play Wizball Finally, which is the best disk turbo system to buy? I'm thinking of "Dolphin DOS" ar "Disk Demon", but If you use one of these chip-based systems, does your disk drive have to be perfectly aligned for it to work? Christopher Haster

Nr. Shiply West Yorkshire

One of the problems with the current range of computer games a that everyone now expects all singing. super-duper, brackout graphics, sound and action and sometimes the roorgammers have to take short ruts to achieve all this. Where this involves using non-documented 'features' of either the hardware or the operating system and kernal calls, the works fine so long as the manufacturers don't change graything, However, it sound very much as though the is the coin here and that you probably have on older version of the 64 them the one used for development of the game You certainly shouldn't start messang around changing chips in the computer since the changes may include modifications to the motherboard as well as changes in the op system addresses. If the game mainely will not run on your machine then you have a leastmate complaint against the dealer from whom you purchased it and should return it. As for a disk system, I have beard excellent reports about Dalphin DOS, although it does involve a bit of fitting. As for disk head alignment, this is certainly more critical when using one of these system but if you use the drive a lot you should consider purchasing one of the alignment lats anyway; it saves an awful lot of heartache in the long run!

# And five more

I would be grateful If you could answer the following

 What is the best language to program games on the 64?
 Basic or machine code? If it is machine code could you name a utility to helo me master it? 2. What language are professional games grommed in? 3. Is the TRILOGIC Experi tridge botter value than the ACTION REPLAY MK IV?

4. What is the best disk drive to buy for the 64? 5. Can you name a good art package that can draw unglescape and metallic scenery? Colin Fulton.

Ayr Scotland

Comparing Basic and M/code is rather like comparing a Porsche with a Mireboth get to the same place in the end, but one gets there a good deal faster! In games, speed is normally a critical factor in the interaction with the play and in this case there is no substitute for pure m/code. The disadvantage of m/ code is that it is slow to write, easy to make metokes and more difficult to learn in the first place. The BASIC found on most mecros is an

Integrated language, which means that each line is actored in turn as it is held in memory. This results in very slow execution speeds, Many languages such as PASCAL or 'C', see a compiler, which allows the language to be reasonably scally learnt and written but which produces an intermediate type of code which is much faster than interpreted code, but slower than pure m/code The 'Dr Watson' series has a book which teaches m/code on the 64 and this is quite good if it's still available. Alternatively, Rae West's Book Programming the CliM 64' has a large section on m/code and how to use it. You will also need a good monitor/ assembler program to speed up writing code, a contridge version is useful when you are harring since lots of machine crashes are nevitable. As far contridaes. it is really a question of seeing which one has the features you want. If they both do everything you want then go for the cheapest one lot the moment that's the EXPERT). The best value for money disk drive

for the 64 has to be the Excelerator from Evenham Micros, it now can bendind with GEOS for only £129-95 ind VAT, Finally, such things as a 'metalic' look depend on your ability as as artist, not on the art package used.

# Expert

I have had my C64 for five years now. I want to buy an Expert Switch. I am pondering how much it will cost and where could lost it? Thomas Maguire Hackney London

I assume you are talking about one of the expert contridors that allow you to "Treeze" gome action and dump graphics screens etc. The most popular ones seem to be Action Replay, Freeze Machino and are called simply the Expert. These all cost around £30 or so and can be obtained respectively from DATEL, EVESHAM MICROS ond RILOGIC

Call us pedantic if you like (Pedanac - Ed) but we're not great fans of the current Stalmast vogue for rewritmg history. Take Capcom/US Gold's 1963 The Battle of Midway. Sorry,

"So this is the ead result of a thedramonay oconomy? Not bad, auto right-ne actually! I think I'll amnesty.

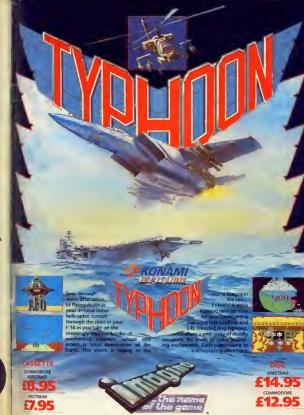

You'll never take me alive, ye delly beagle!" Fext Igneres the fireerms

excuse us but the Battle of Michway happened in June 1942. As for Gremlm's Micht Rusier. Well we don't know where to begin. According to the manual the Bismark was sunk on 36 May 1941 by a Grumman Avenger, an American torpedo bomber. Well that should come as news to the Admiralty. The Burnark was attacked by a squadron of Farrey Swortlfish on the 20th which damaged the German battleship's steering year. It was only the day after that she was sunk when engaged by a pack of British boots from which the crusser HMS Dornetshire fired two tomedoes which frashed her off. History lesson over. Grenim take fifty inner I must not falsely history for my own ends."

# 51

· Maanwhile back to the present and the hispous world of software. With Latelus already shelved because of sts. ahem. debt to 2-Type, Mechageme have now turned their corporate guns on Armalyte, classing that the shoot 'em up also mps the frem com-on off. Battle has begun but no writs are known to have been exchanged yet. Which can't be said of Great Giana Sisters II which has been officially withdrawn, it seems the game was being exhibited at a Hanover show by naughty softco Rainbow Arts when a Nintendo offical walked past. He biew for top, ordered the came to be swatched off and had an myunction served within hours. Wallop!
